

Supplementary Figure S6

Supplementary Figure S6. Effect of various clinical parameters on percentage change in MIP-1 α : (a) estimated blood loss (EBL) on $\Delta\text{MIP-1}\alpha_{24\text{h}/8\text{h}}$; (b) estimated blood loss (EBL) on $\Delta\text{MIP-1}\alpha_{72\text{h}/24\text{h}}$; (c) length of surgery (LoS) on $\Delta\text{MIP-1}\alpha_{72\text{h}/24\text{h}}$; (d) physical status classification system (ASA) score on $\Delta\text{MIP-1}\alpha_{8\text{h}/0}$; (e) physical status classification system (ASA) score on $\Delta\text{MIP-1}\alpha_{24\text{h}/0}$. Data presented as geometric means with 95%CI and analyzed using t-test for independent samples (panels a-c) or one-way ANOVA (panels d-e). a, significantly different from ASA=1; b, significantly different from ASA=2; c, significantly different from ASA=3.
