

Table S1. Seasonal variations in vitamin D serum levels.

	Entire cohort	Ulcerative colitis	Crohn's disease
Winter season			
(i.e. Oct–Mar), <i>n</i>			
Overall value, <i>n</i> ; median (range)	303 patients 24 (3–75)	134 patients 25 (3–75)	164 patients 23 (4–70)
Without substitution, median (range)	134 patients 21 (3–70)	57 patients 21 (3–47)	77 patients 21 (4–70)
With substitution, median (range)	160 patients 29 (4–75)	79 patients 31 (4–75)	81 patients 28 (5–64)
Summer season			
(i.e. Apr–Sep), <i>n</i>			
Overall value, median (range)	167 patients 29 (3–100)	59 patients 31 (5–100)	108 patients 27 (3–76)
Without substitution, median (range)	78 patients 26 (3–52)	29 patients 28 (5–52)	49 patients 26 (3–49)
With substitution, median (range)	85 patients 34 (6–100)	29 patients 35 (8–100)	56 patients 32.5 (6–76)
