

## Supplementary Material

Results of model averaging, spatial autocorrelation test, and overdispersion test

**Table S1.** Legend of the different acronyms in used in the analysis.

<u>Land cover</u>	<u>acronym in the model average</u>
Tree_hedgerows_100m	tre_hdg_100
Annual_crop_100m	ann_crp_100
c	rrl_100
Water_1km	wtr_1km
Forest_1km	frs_1km
Shrubland_1km	shr_1km
Herbs_10m	hrb_10m
Season	seas
Longitude	long

**Table S2.** Results of the Pearson correlation of the final variables used in the GLM and GLMM models.

	tre_hdg_100	ann_crp_100	rrl_100	wtr_1km	frs_1km	shr_1km	Herbs_10m
tre_hdg_100	1	-0.031	-0.020	-0.064	0.029	-0.106	0.104
ann_crp_100		1	-0.021	-0.086	-0.002	-0.136	0.033
rrl_100			1	-0.076	0.075	-0.080	0.098
wtr_1km				1	-0.086	-0.044	0.045
frs_1km					1	-0.214	-0.204
shr_1km						1	-0.162
Herbs_10m							1

**Table S3.** Detailed results of the GLMM used in the analysis, including the results of the Spatial autocorrelation test (Moran's I) and Overdispersion test.

**Richness**      Model ZI poisson

**Random effects:**

Groups	Variance	Std.Dev.
survey site:farm	3.197e-02	1.788e-01
farm	3.236e-10	1.799e-05
Julian day	5.611e-11	7.490e-06

**Spatial autocorrelation test**

Moran I statistic standard deviate = 0.38193, p-value = 0.3513

**Overdispersion test**

Pearson Chi-  
Squared: 832.3973  
Degrees of  
Freedom: 2587  
Dispersion Ratio:  
0.3217616  
p-value:1

**General activity**      Model averaging  
AICc<2
