The supplementary materials include Table S1-S4 and Figure S1. Table S1 shows the location, measurement information, and the human intervention information of the studied beaches. Table S2, S3, and S4 show the principal component eigenvalues, variance contribution rates and cumulative contribution rates of sandy beach in northern Zhejiang (NZ), central Zhejiang (CZ), and southern Zhejiang (SZ), respectively. NZ1 in the Table S2, CZ1 in Table S3, and SZ1 in Table S4 represent the first principal component in NZ, CZ, SZ beaches, respectively. Figure S1 shows the profile and sampling site setting examples for beaches with different length and the calculation of beach slope and the dry beach width.

Table S1. Location, measurement information, and the human intervention information of the studied beaches

ID	Beach	Location	Island beach	Measurement date	Profile number	Sample number	Seawall	Breakwater	Beach nourishment	Drainage output

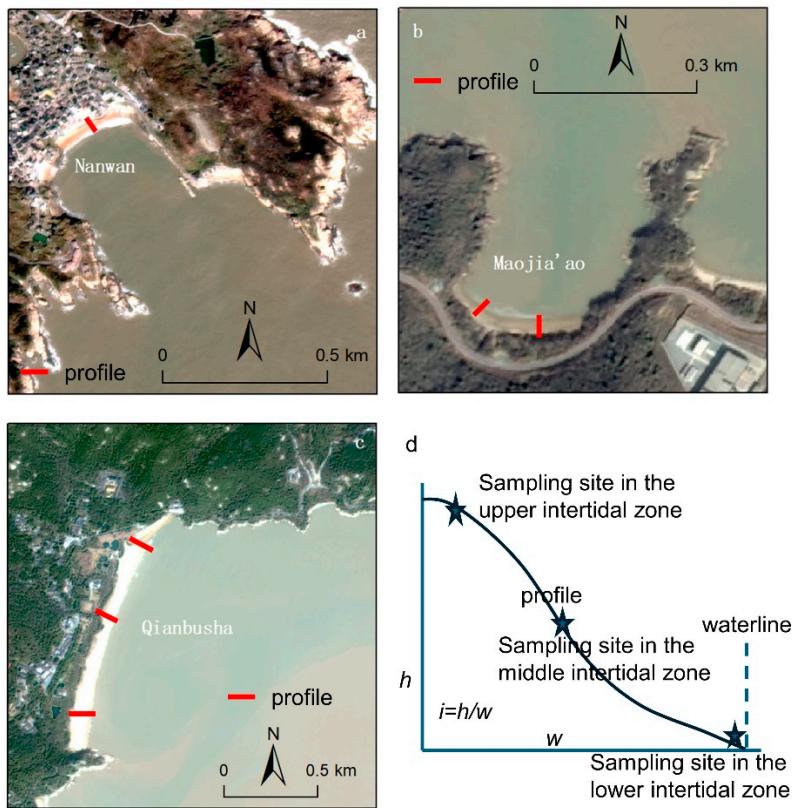

Figure S1. Examples of profile settings on the beach with different lengths (a-c) and the sampling sites (d): Nanwan beach (<300 m) (a), Maojia'ao beach(300 m-500 m) (b), and Qianbusha beach (>500 m). h is the maximum height of the profile, w is the dry beach width, and i is the beach slope. The average slopes and the grain size characteristic values shown in the main text are the arithmetic average values calculated from all the profiles and samples on each beach.

Table S2. The principal component eigenvalues, variance contribution rates and cumulative contribution rates of sandy beach in NZ

PC	Eigenval ue	Variance contribution rate	Accumulated variance contribution rate
NZ1	3.716	33.784	33.784
NZ2	1.931	17.554	51.338
NZ3	1.325	12.044	63.382
NZ4	1.054	9.585	72.967
NZ5	0.940	8.544	81.511
NZ6	0.776	7.056	88.567
NZ7	0.678	6.163	94.730
NZ8	0.257	2.336	97.066
NZ9	0.206	1.874	98.940
NZ10	0.093	0.845	99.785
NZ11	0.024	0.215	100.000

Table S3. The principal component eigenvalues, variance contribution rates and cumulative contribution rates of sandy beach in CZ

PC	Eigenvalue	Variance contribution rate	Accumulated variance contribution rate
CZ1	3.515	31.952	31.952
CZ2	1.844	16.763	48.715
CZ3	1.745	15.867	64.582
CZ4	1.487	13.521	78.103
CZ5	0.808	7.347	85.450
CZ6	0.675	6.137	91.587
CZ7	0.352	3.198	94.785
CZ8	0.319	2.904	97.689
CZ9	0.136	1.232	98.921
CZ10	0.101	0.918	99.839
CZ11	0.018	0.161	100.000

Table S4. The principal component eigenvalues, variance contribution rates and cumulative contribution rates of sandy beach in SZ

PC	Eigenvalue	Variance contribution rate (%)	Accumulated variance contribution rate (%)
SZ1	2.943	26.753	26.753
SZ2	2.345	21.319	48.072
SZ3	1.497	13.610	61.682
SZ4	1.243	11.297	72.980
SZ5	1.018	9.255	82.234
SZ6	0.689	6.267	88.502
SZ7	0.492	4.473	92.975
SZ8	0.358	3.251	96.226
SZ9	0.259	2.352	98.578
SZ10	0.145	1.319	99.897
SZ11	0.011	0.103	100.000
