Figure S1 - Maps showing cumulative per capita CO₂ (A), the percent increase in prevalence of zinc deficiency (B), and the percent increase in protein deficiency (C) with a CO₂ concentration of 550 parts per million. Pink, blue and green colors indicate lower cumulative per capita CO₂ emissions and a lower percent increase in the prevalence of zinc and protein deficiency. Yellow and red colors indicate higher cumulative per capita CO₂ emissions and prevalence of zinc and protein deficiency. Data was unavailable for countries in white.

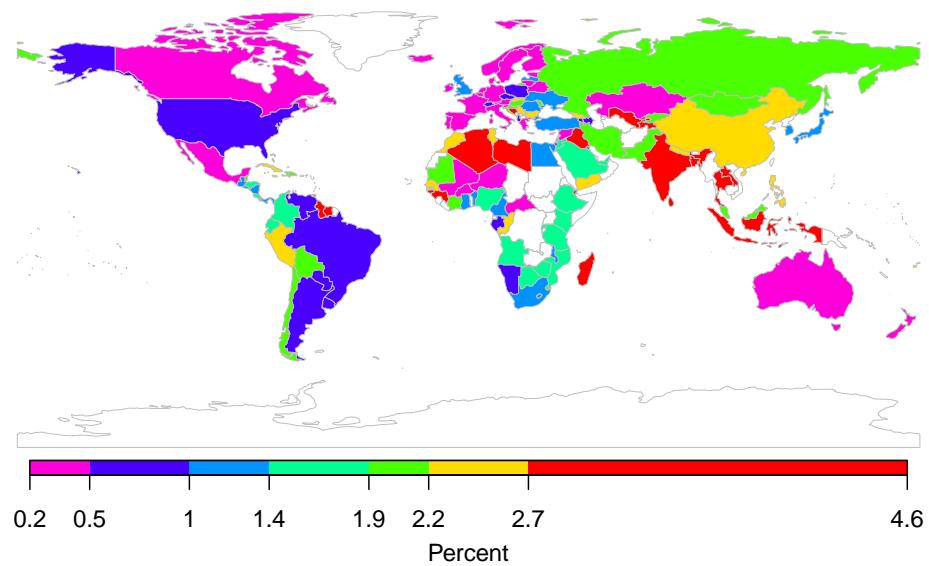

(a) Estimated Cumulative CO₂ Per Capita (2011–2050)

(b) Modeled % Increase in those at Risk of Zinc Deficiency with eCO₂

(c) Modeled % Increase in those at Risk of Protein Deficiency with eCO₂

Note. eCO₂ = elevated carbon dioxide
