

(a)

(b)

Figure S1. Twenty-four-hour time–kill curves of aztreonam (ATM) and zidebactam (ZID), alone and in 1:1 combination, on: (a) *C. amalonaticus* N18; (b) *S. maltophilia*. K: positive control (without the addition of antimicrobials). Mean values and standard deviation of three independent experiments are reported.
