

Figure S3b. PCA Score and Loading Plots of a Combined Pre- and Post-Exercise Urinary Metabolite Data Matrix Containing 255 Participants and 2x47 Metabolites. The first three PCs are visualized; Top: Score Plots, data points stand for participants and are color coded according to the sex of the participants; Bottom: Loading Plots, data points stand for metabolites and are color coded according to the pre- or post-exercise state.

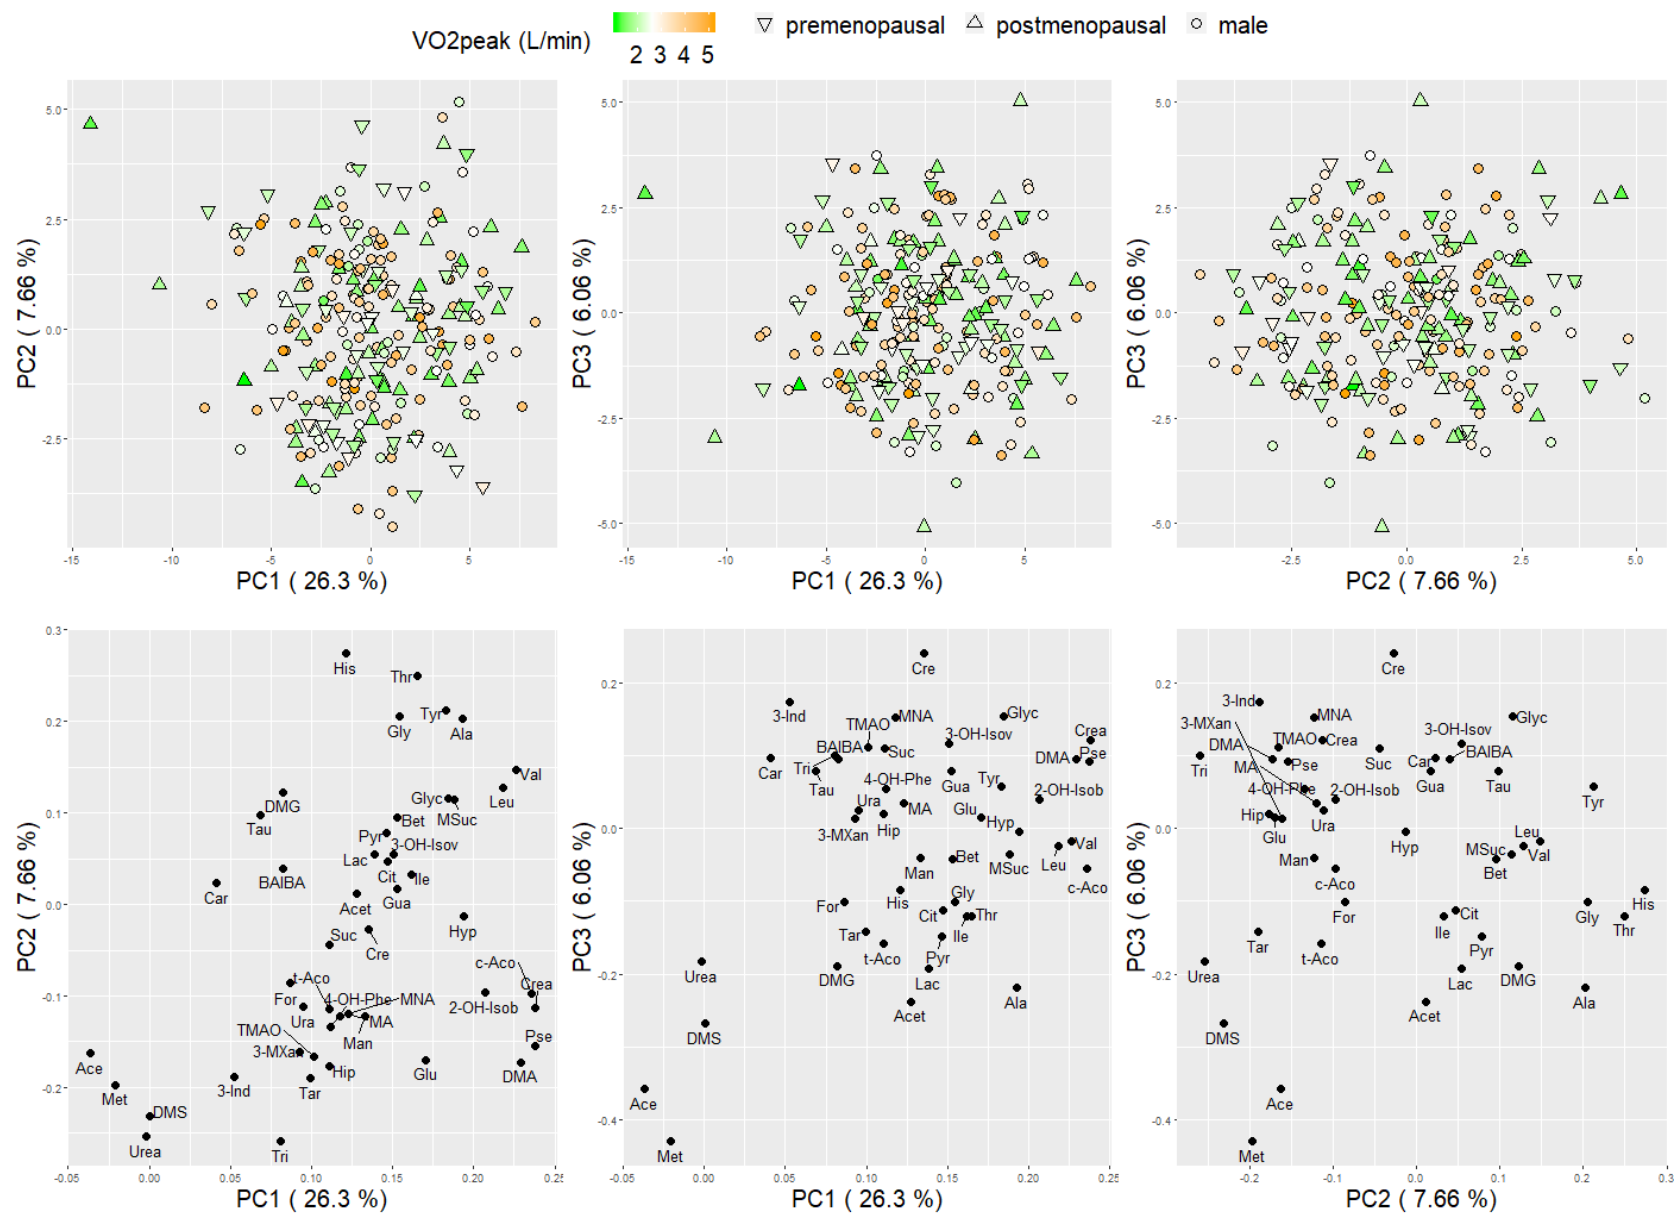

Figure S3d. PCA Score and Loading Plots of the Adjusted Post-Exercise Urinary Metabolite Data. The first three PCs are visualized; Top: Score Plots, data points stand for participants and are color coded according to the VO₂peak of the participants; Bottom: Loading Plots, data points stand for metabolites.
