## Supplementary Figure and Tables

**Figure S1.** Elution tests from cartridges MI (1<sup>st</sup> extraction) and MII (2<sup>nd</sup> extraction) with 3 aliquots of DCM solvent (1,2,3) Cartridge B= Bond Elut ENV; I= Isolute® ENV+; L= LiChrolut® EN; W= white wine; M=medium spike

**Table S1.** Comparison of cartridges; percentage of compounds found in the 2<sup>nd</sup> and 3<sup>rd</sup> solvent fractions (dichloromethane) considering 100% the content of the 1<sup>st</sup> fraction. Descriptive statistics, one-way Anova analysis and post-hoc test (Tukey test p<0.05) (N= 7 wine sample; 4 white and 3 red)

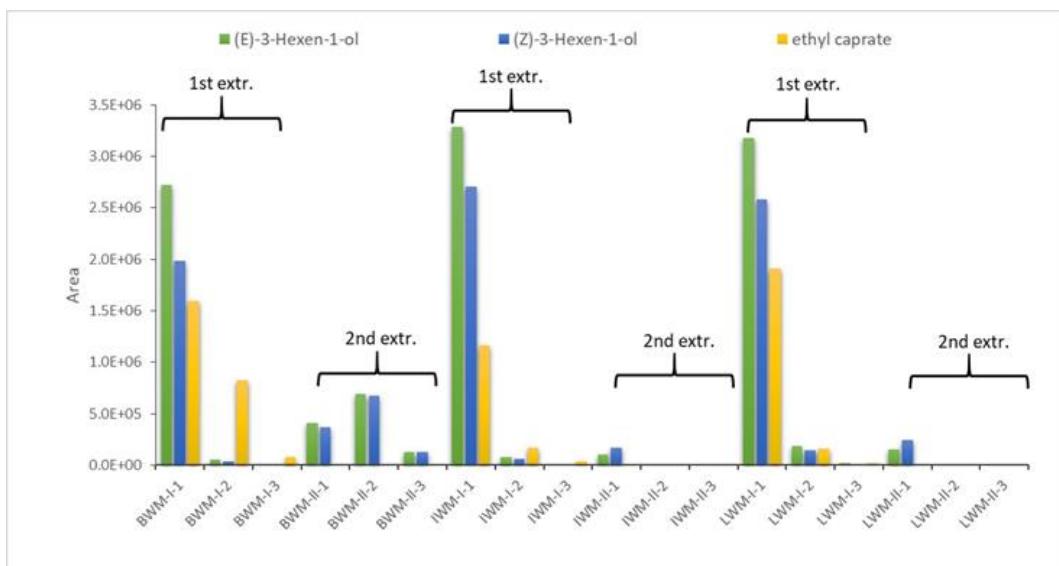

**Table S2:** Recovery, intraday and interday precision for red and white wines, in red compounds with unacceptable values.

**Table S3.** Repeatability of the accelerated aging treatment of two different Gewürztraminer wines (A, B) kept for 4 days at T equal to 40 °C and then analyzed following the validated SPE-GC-MS/MS method.

**Table S4.** Descriptive statistics of the measured volatile compounds and one-way Anova analysis and post-hoc test results for the Gewürztraminer wines.

**Table S5.** Descriptive statistics of the measured volatile compounds and one-way Anova analysis results for the Teroldego wines.

**Table S6:** basic enological analysis of commercial wines used for accelerating aging

**Figure S1.** Elution tests from cartridges M<sub>I</sub> (1<sup>st</sup> extraction) and M<sub>II</sub> (2<sup>nd</sup> extraction) with 3 aliquots of DCM solvent (1,2,3) Cartridge B= Bond Elut ENV; I= Isolute® ENV+; L= LiChrolut® EN; W= white wine; M=medium spike

**Table S1.** comparison of cartridges; percentage of compounds found in the 2<sup>nd</sup> and 3<sup>rd</sup> solvent fractions (dichloromethane) considering 100% the content of the 1<sup>st</sup> fraction. Descriptive statistics and one-way Anova analysis and post-hoc test (Tukey test p<0.05) (N= 7 wine sample; 4 white and 3 red)
