

Supplementary Figure S1. Effect of VA on lipolysis markers in liver of COC mice. (A) Protein levels of p-HSL and ATGL were analyzed by a Western blot analysis. p-HSL was expressed relative to total HSL and ATGL was expressed relative to β -actin. All data are expressed as mean \pm S.E.M. ($n = 3$). * $p < 0.05$ vs. vehicle-treated COC mice. COC, cancer-obesity comorbidity; HFD, high fat diet; VA, vanillic acid.
