

**Table S2 The diagnosis performance of sACE by ethnicity in sarcoidosis patient**

Ethnicity	Sensitivity	Specificity	PLR	NLR	DOR	Area under curve (95% CI)
Caucasian	63%	92%	8.3	0.4	21	0.87(0.84-0.90)
Asian	53%	95%	11.1	0.5	22	0.67 (0.62-0.71)

sACE: serum Angiotensin-Converting Enzyme; PLR: positive likelihood ratio; NLR: negative likelihood ratio;

DOR: diagnostic odds ratio; CI: confidence interval
