

## Supplementary Figure S1

Wakako Fujita et al., biomolecules

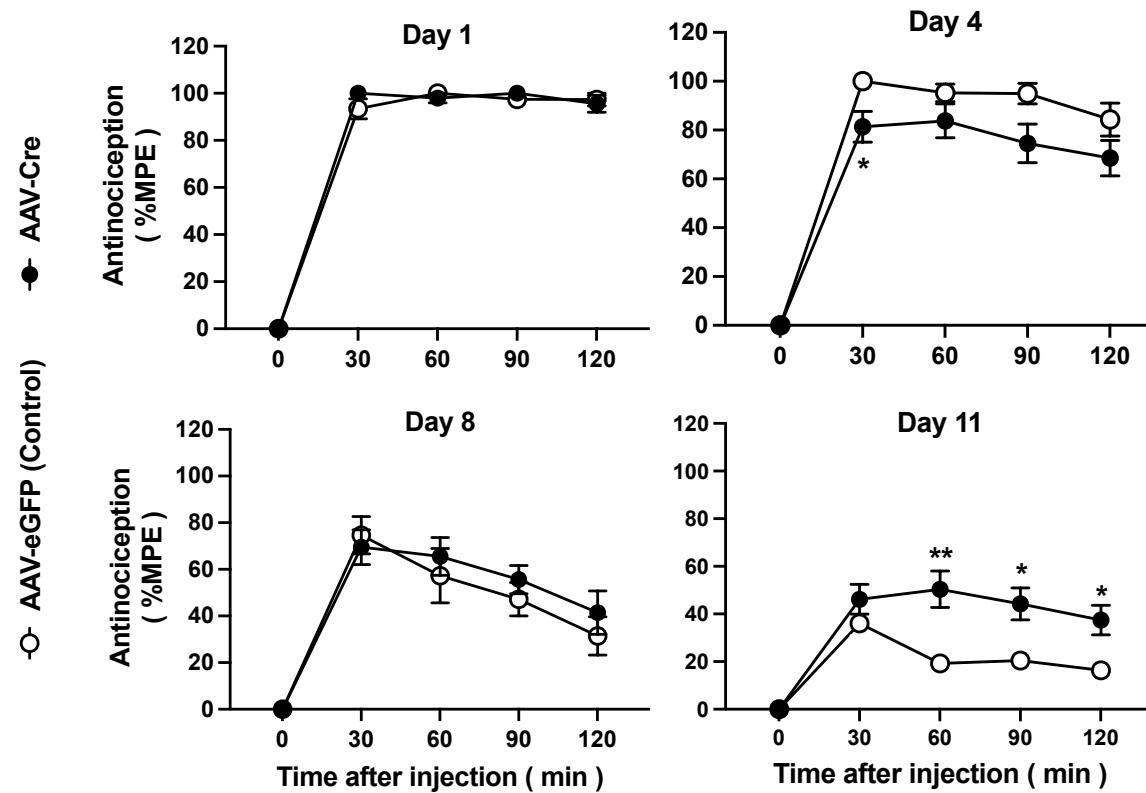

Figure S1. The effect of knockdown of RTP4 in PVN on the development of antinociceptive tolerance to morphine. The antinociceptive effect of morphine after morphine administration on Day 1, Day4, Day8 and Day 11. Data are the mean  $\pm$  S.E.M. n=7 (AAV-eGFP, control, open circle), n=10 (AAV-Cre, closed circle), \* $p<0.05$ , \*\* $p<0.01$ , vs. AAV-eGFP (Control), unpaired *t*-test.

**Supplementary Table S1***Wakako Fujita et al., biomolecules*

Molecules	Relative mRNA expression (GAPDH = 1000)	n
TLR4	2.538 ± 0.079	6
OPRM1	0.013 ± 0.002	12
OPRD1	0.002 ± 0.0001	12
RTP4	0.339 ± 0.031	12

Table S1. The relative expression of TLR4, OPRM1, OPRD1 and RTP4 mRNA in SIM-A9 cells without any treatment. RT-qPCR was performed with specific primers against TLR4, OPRM1, OPRD1 and RTP4. Data are the mean ± S.E.M. n=6-12
