Norepinephrine Transporter (NET)/SLC6A2

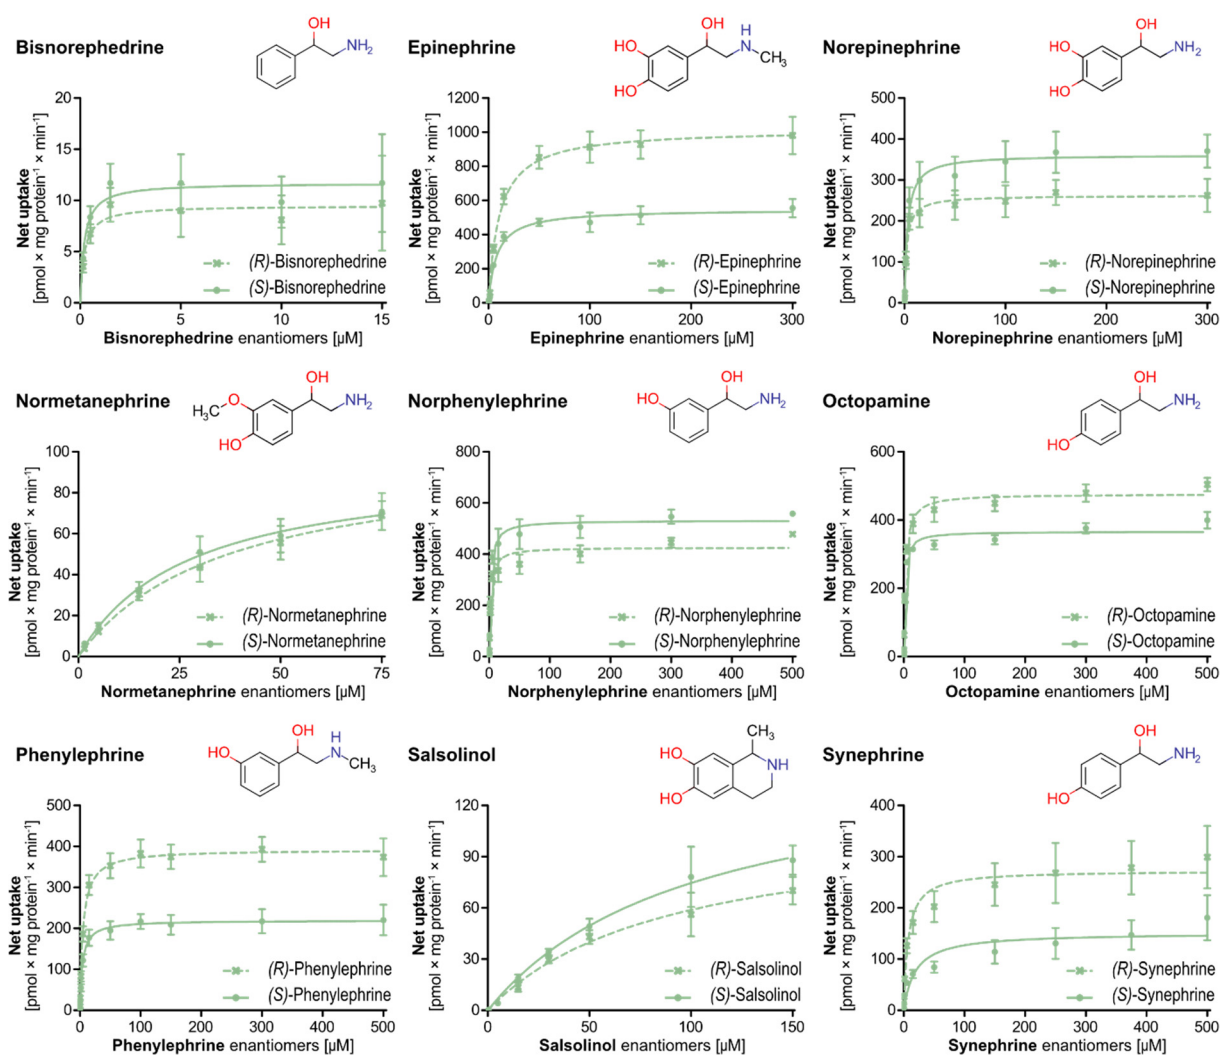

Figure S1 Net uptake curves of the norepinephrine transporter (NET) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean \pm SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Dopamine Transporter (DAT)/SLC6A3

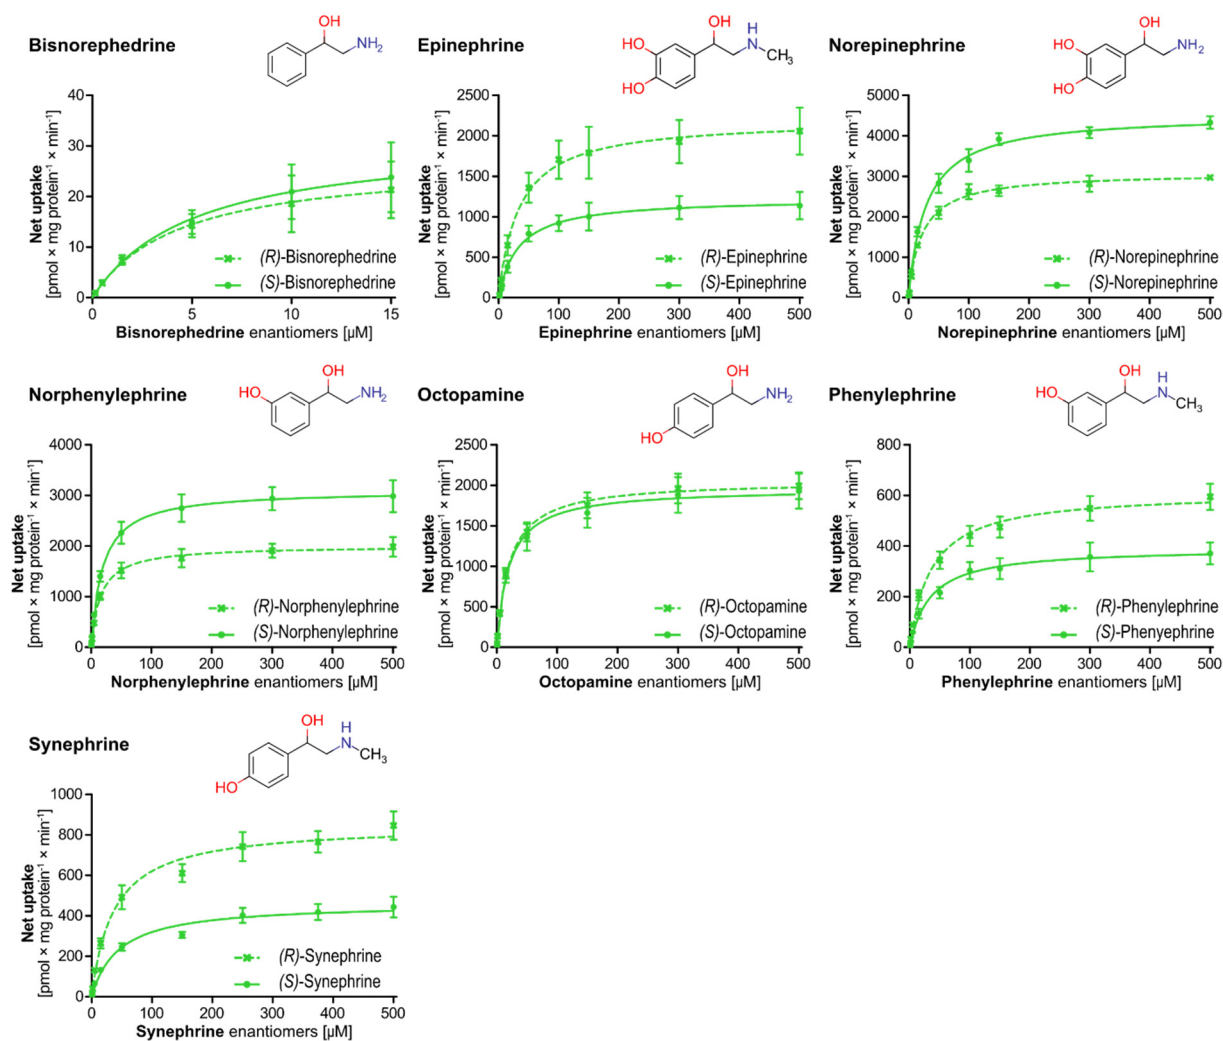

Figure S2 Net uptake curves of the dopamine transporter (DAT) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean \pm SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Serotonin Transporter (SERT)/SLC6A4

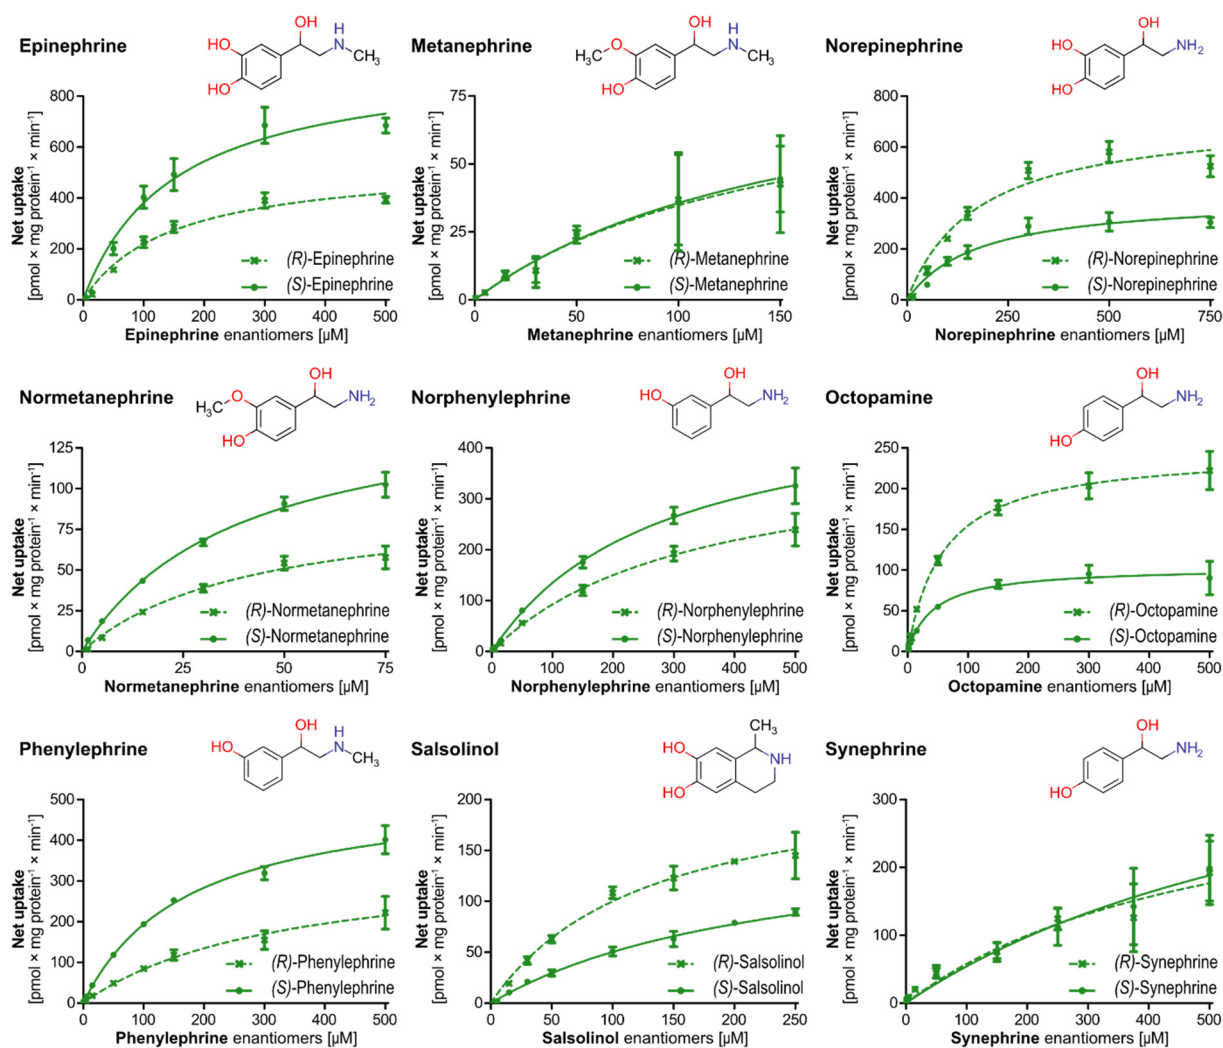

Figure S3 Net uptake curves of the serotonin transporter (SERT) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean ± SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Organic cation transporter 1 (OCT1)/SLC22A1

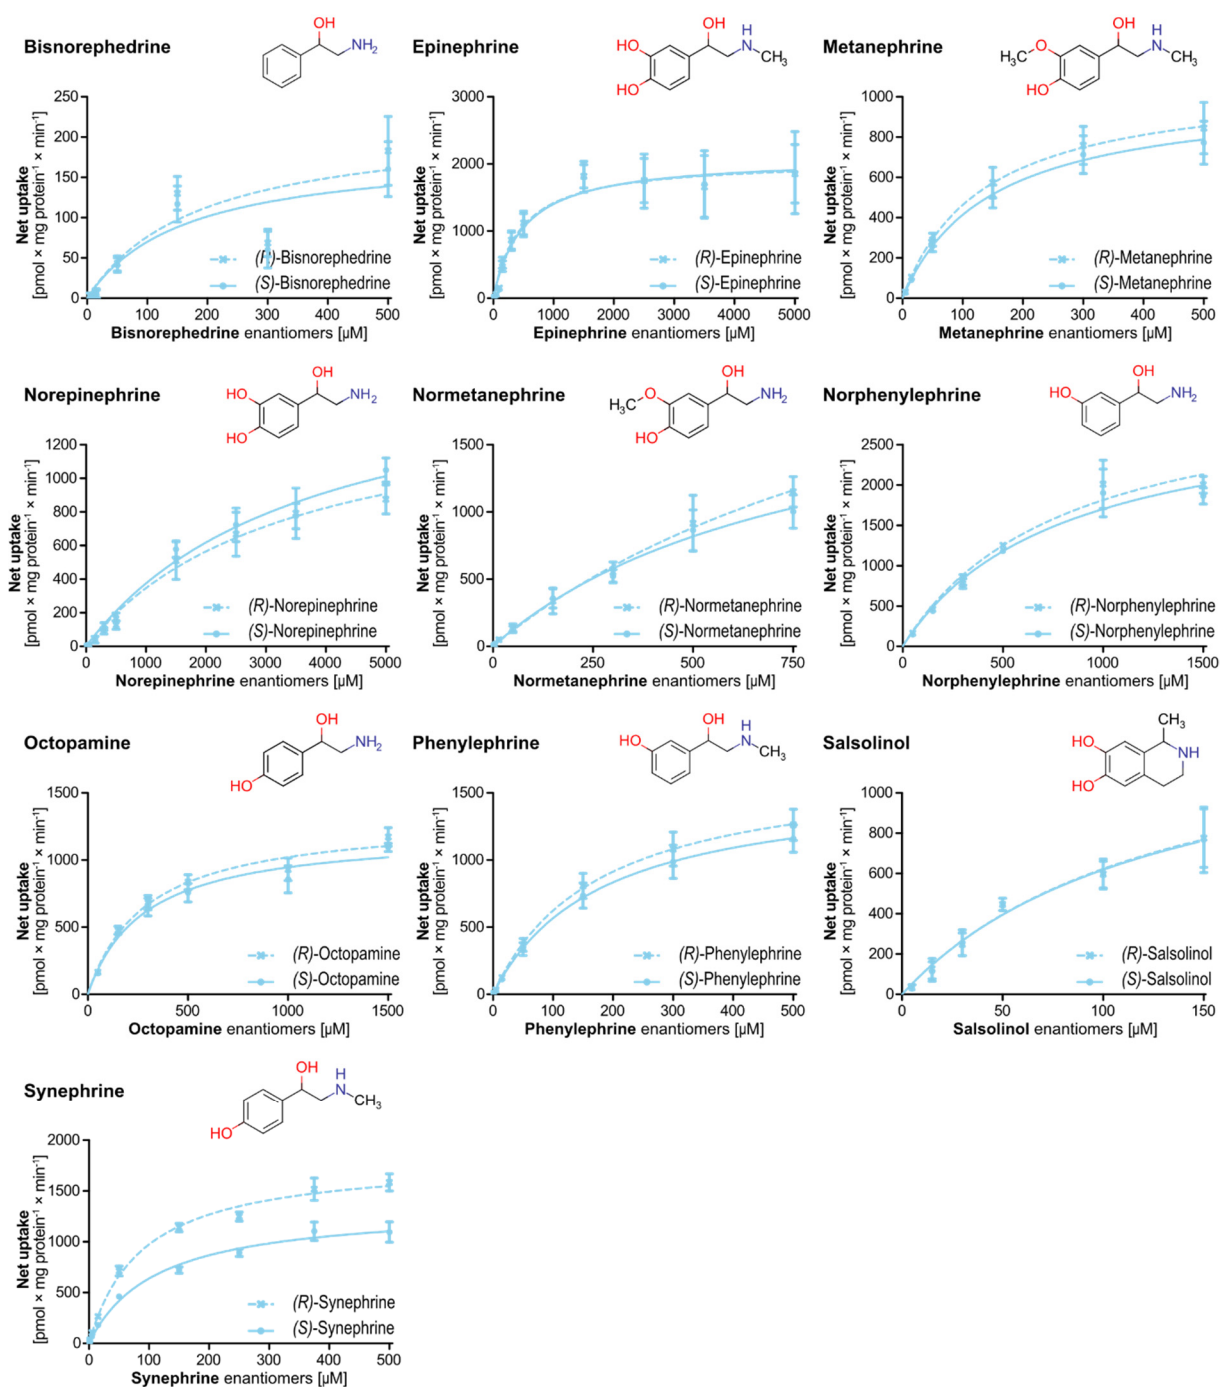

Figure S4 Net uptake curves of the organic cation transporter 1 (OCT1) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean \pm SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Organic cation transporter 2 (OCT2)/SLC22A2

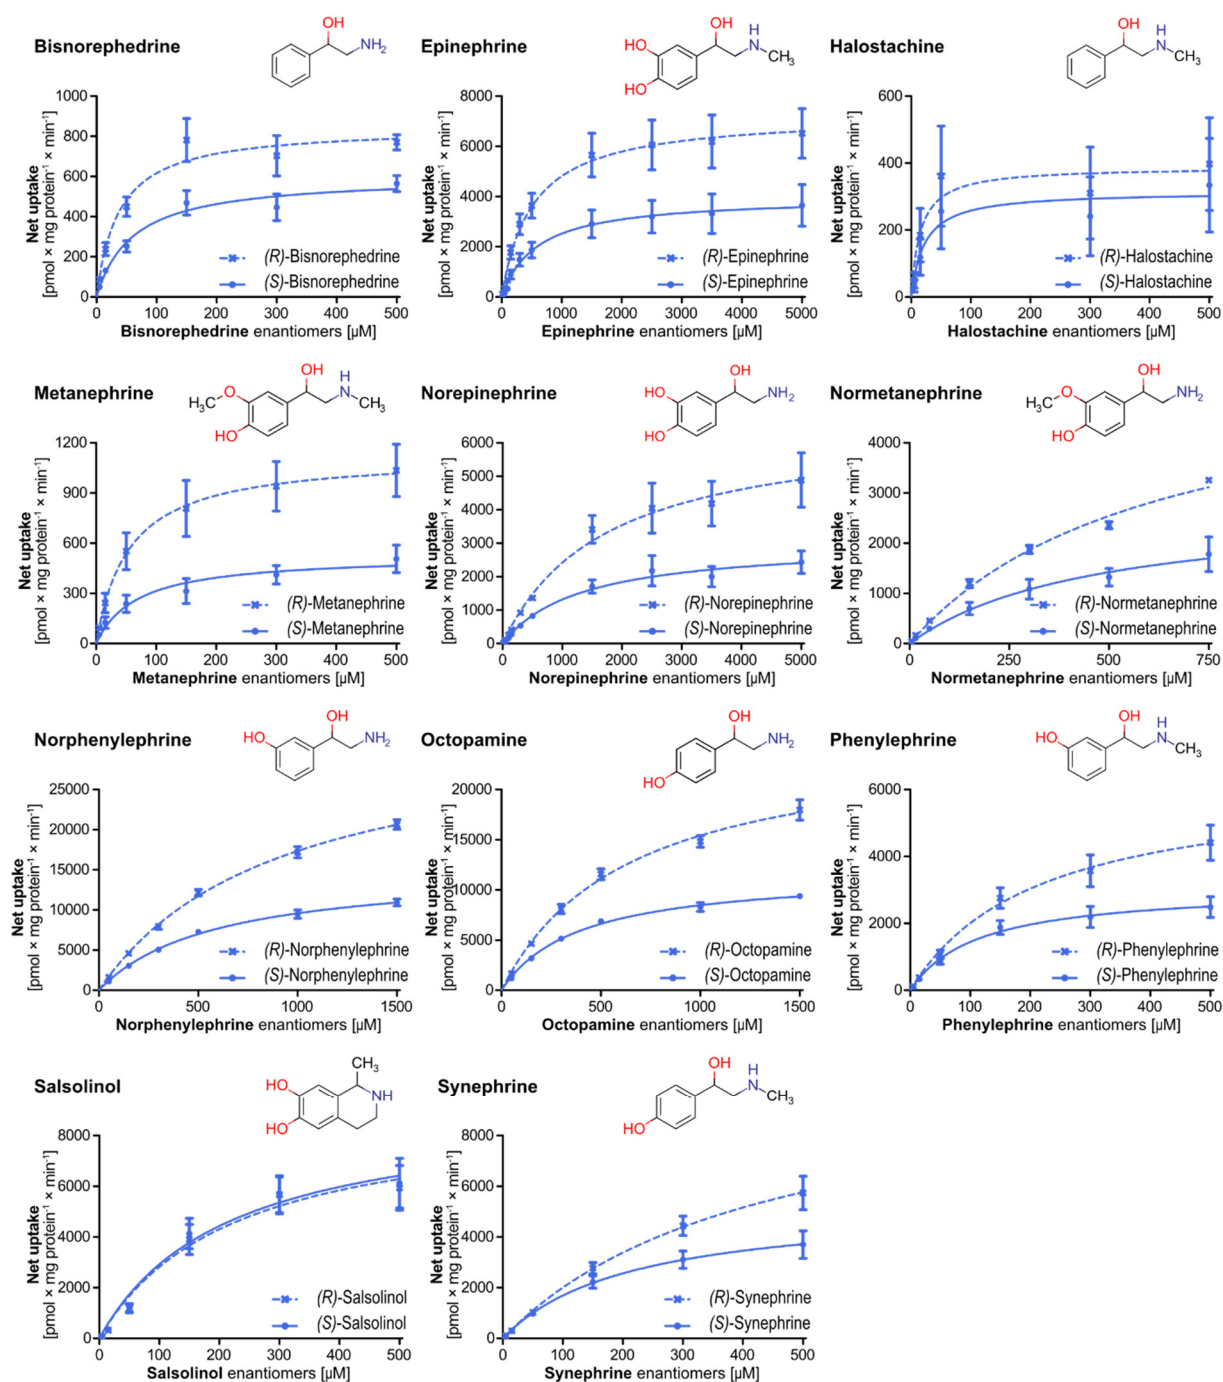

Figure S5 Net uptake curves of the organic cation transporter 2 (OCT2) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean \pm SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Organic cation transporter 3 (OCT1)/SLC22A3

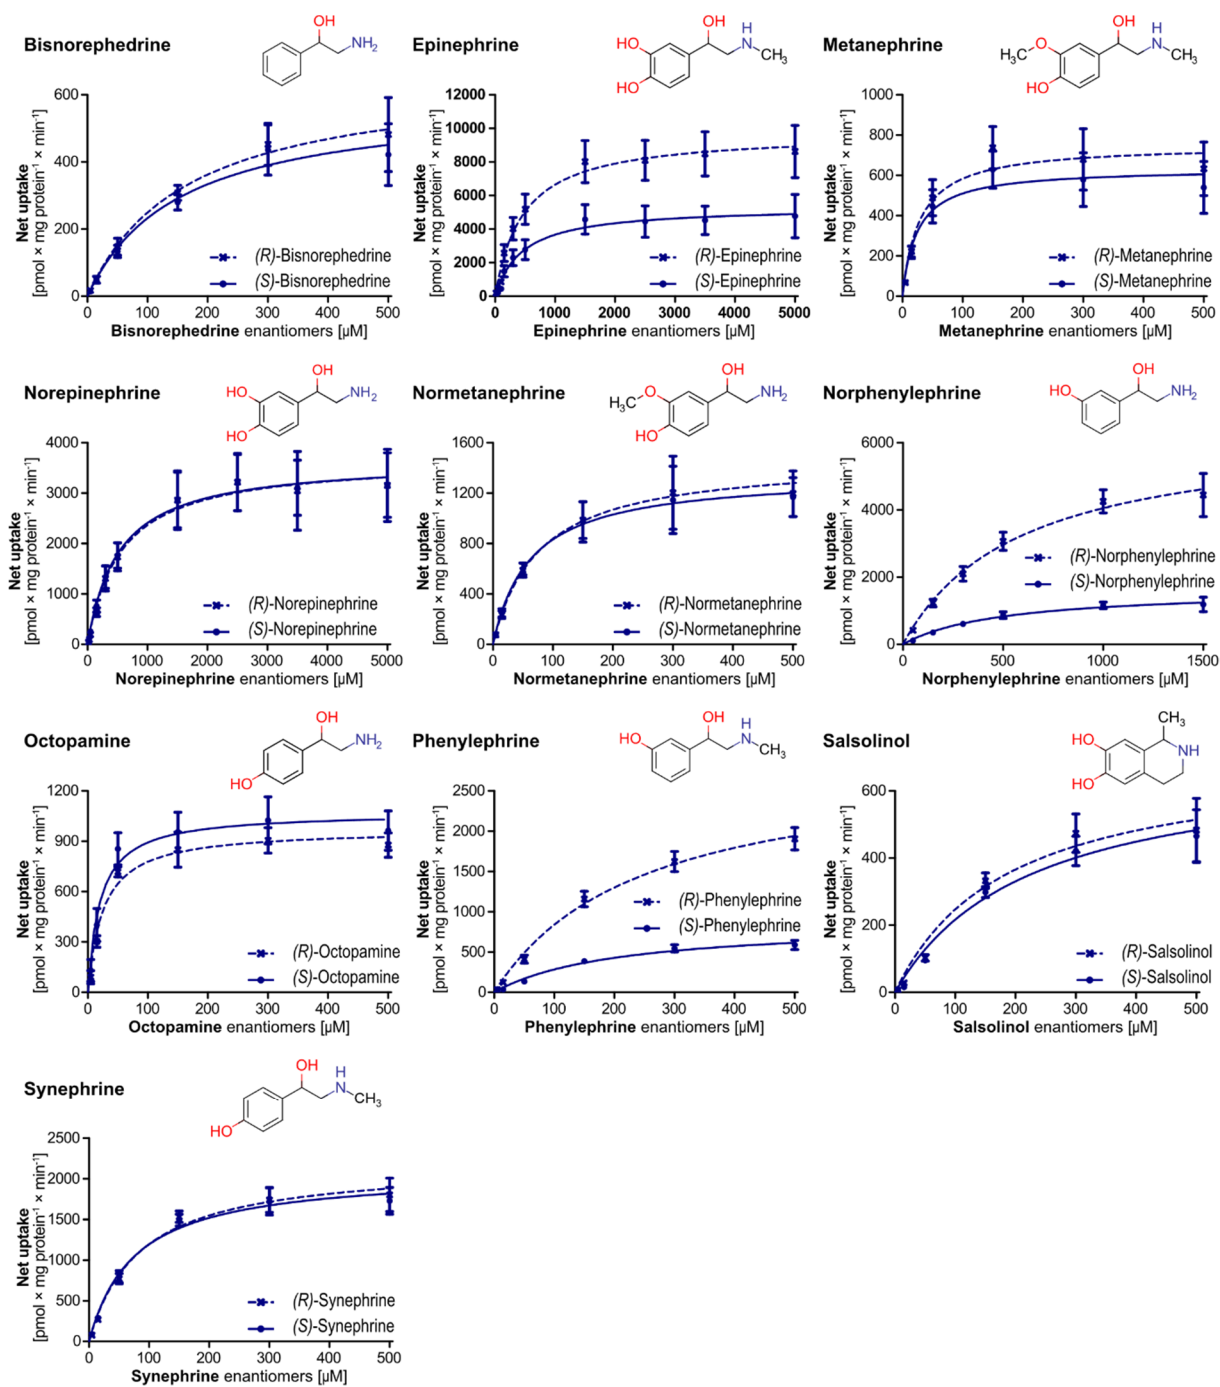

Figure S6 Net uptake curves of the organic cation transporter 3 (OCT3) for investigated chiral phenylethylamines (in alphabetical order). Data is presented as mean \pm SEM of at least three independent experiments. Not transported substances (no net uptake) are not shown.

Asterisks indicate statistical significance of the differences between the two enantiomers or between the uptake by OCT2 wildtype compared to the uptake by the OCT2 A270S variant (Student's *t*-test; **p* < 0.05, ***p* < 0.01, ****p* < 0.001).
