

Figure S4. Kaplan-Meier estimator showing the impact of Bi-allelic imbalances of chromosomes 1, 3 and 8 on OS of UM patients. **A and B:** Survival probability obtained from UM analyzed by UMpanel (left panels) or TCGA-UM study (right panel) obtained from patients displaying D3vsImb3+Imb1 (D3 n=16, Imb3+Imb1 n=16) (**A**), or D3vsImb3+Imb8 (D3 n=14, Imb3+Imb8 n=21) (**B**). X axis indicates the time expressed in months, while y axis reports OS expressed as percentage.
