

Figure S1. Effect of salt stress on germination (%) in sorghum genotypes

C.D. 1.887

SE(d) 0.958

SE(m) 1.547

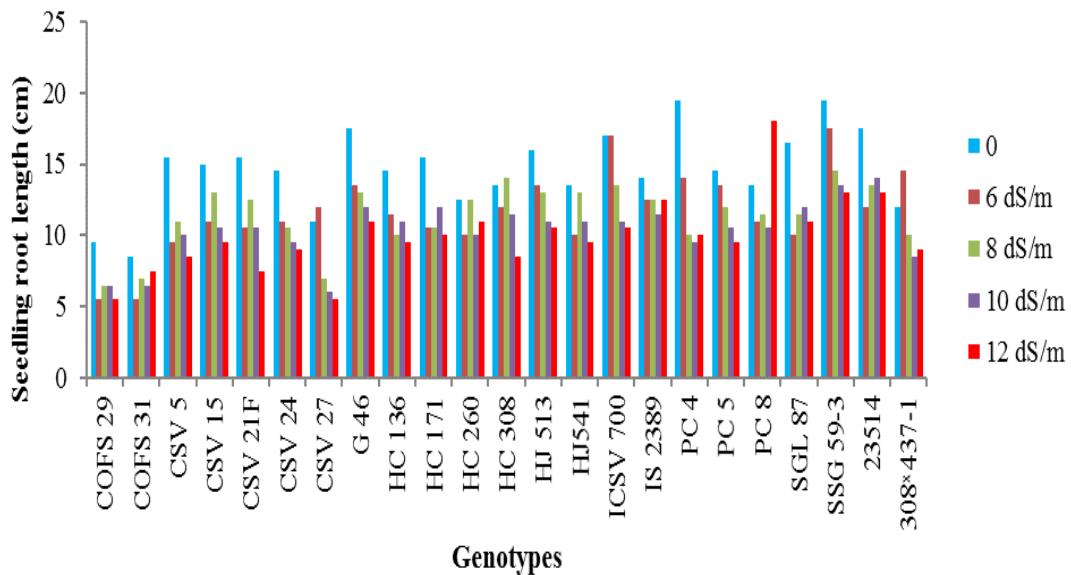

Figure S2. Effect of salt stress on seedling root length (cm) in sorghum genotypes

C.D. 0.689

SE(d) 0.350

SE(m) 0.247

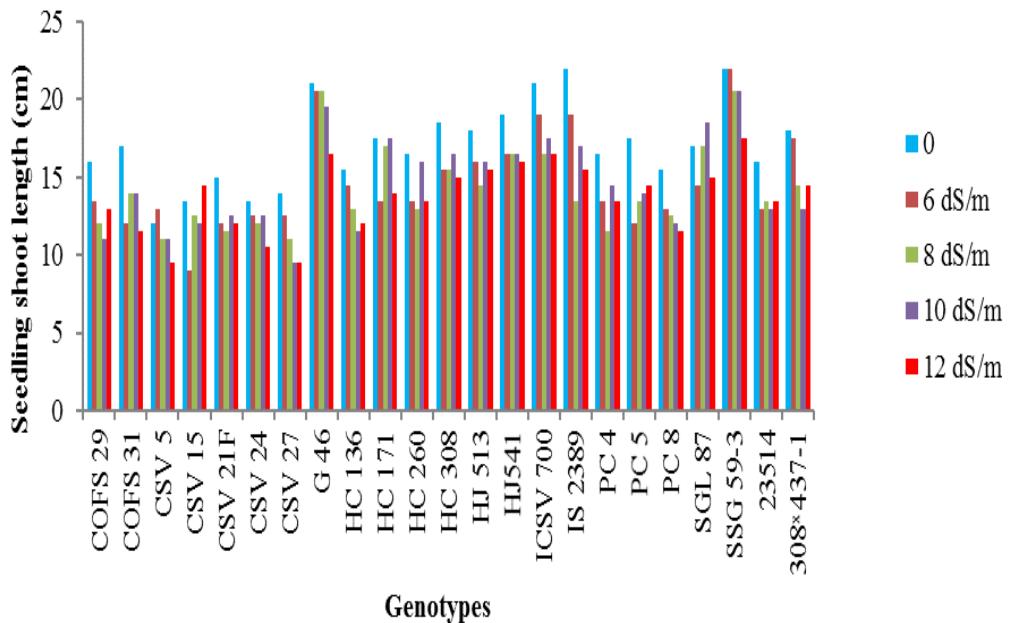

Figure S3. Effect of salt stress on seedling shoot length (cm) in sorghum genotypes

C.D. 0.646 SE(d) 0.328 SE(m) 0.232

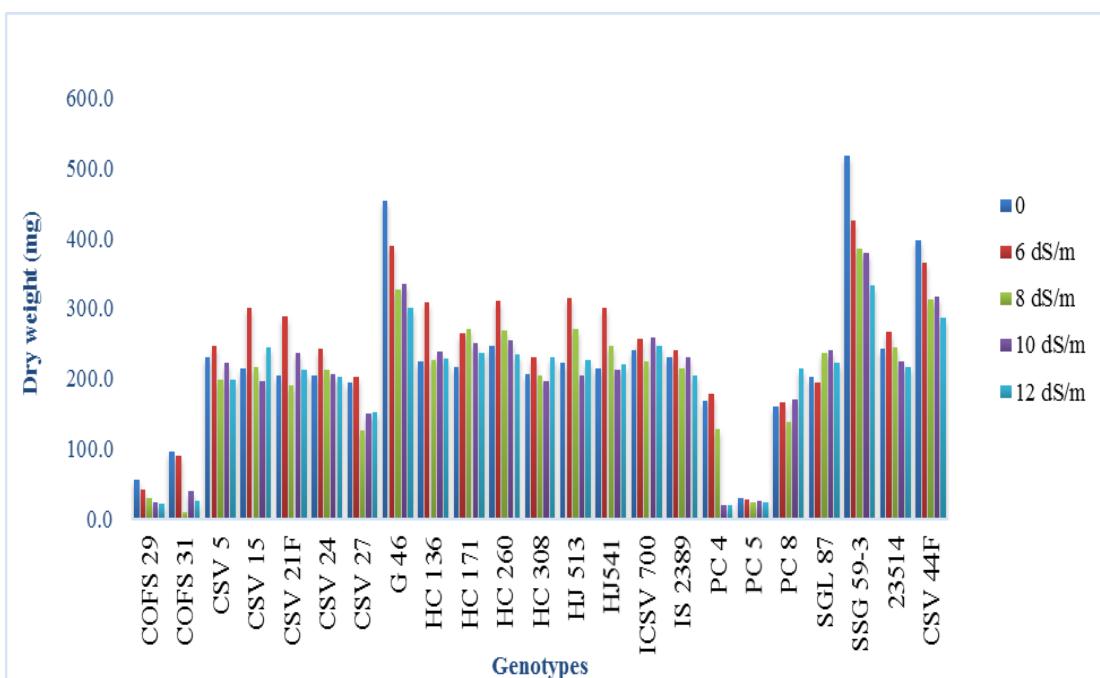

Figure S4. Effect of salt stress on dry seedling weight (mg) in sorghum genotypes

C.D. 1.546 SE(d) 0.623 SE(m) 0.546

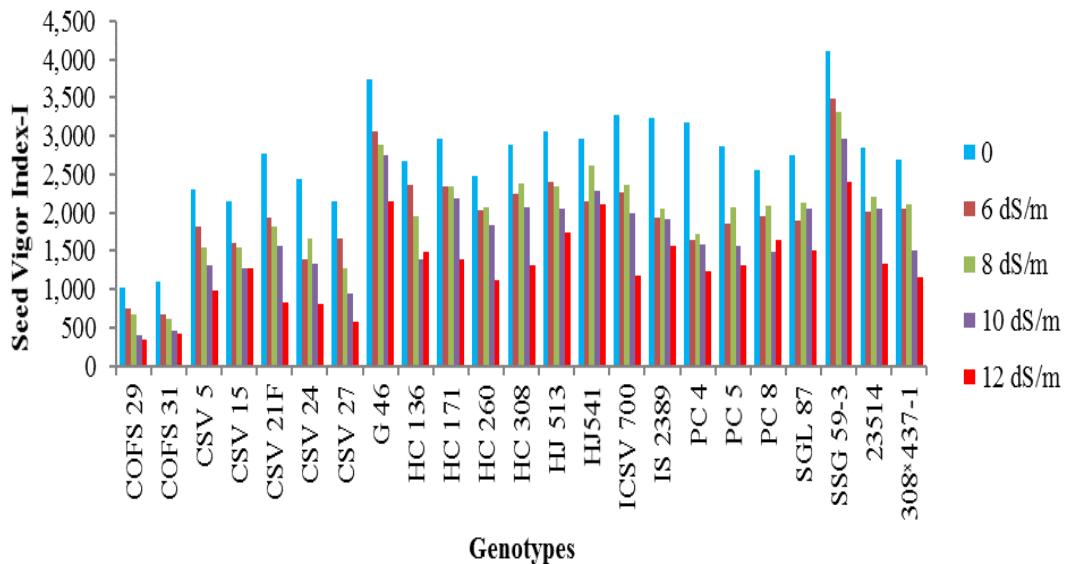

Figure S5. Effect of salt stress on vigor index-I in sorghum genotypes

C.D. 81.311 SE(d) 41.280 SE(m) 29.190

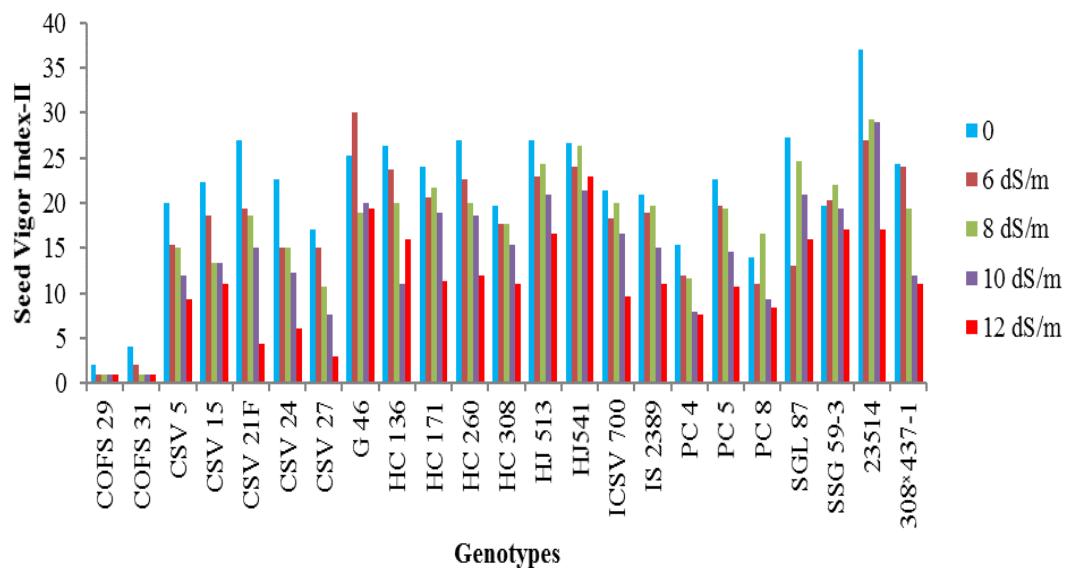

Figure S6. Effect of salt stress on vigor index-II in sorghum genotypes

C.D. 0.838 SE(d) 0.426 SE(m) 0.301

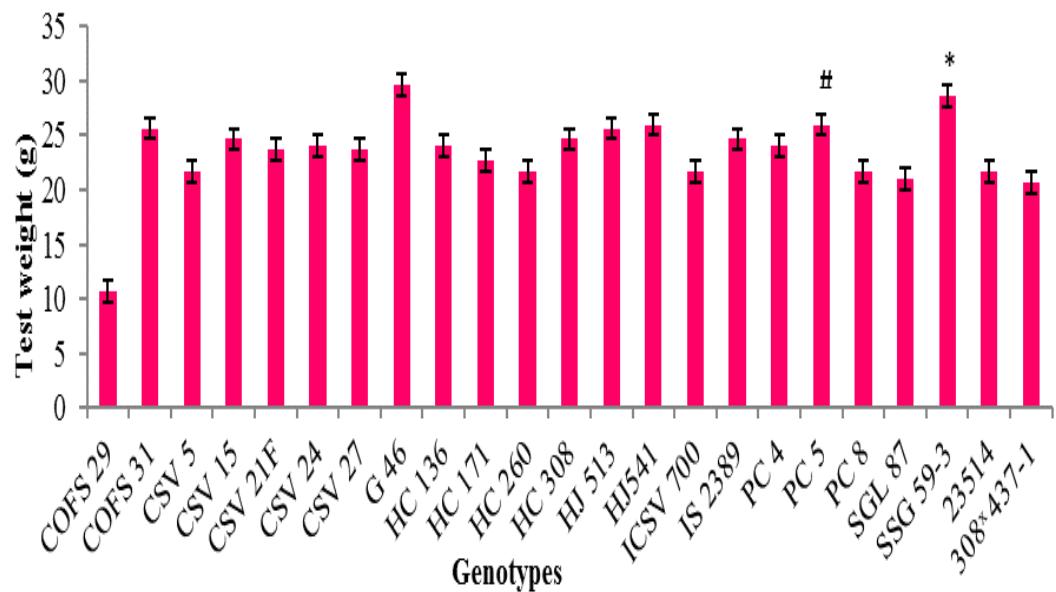

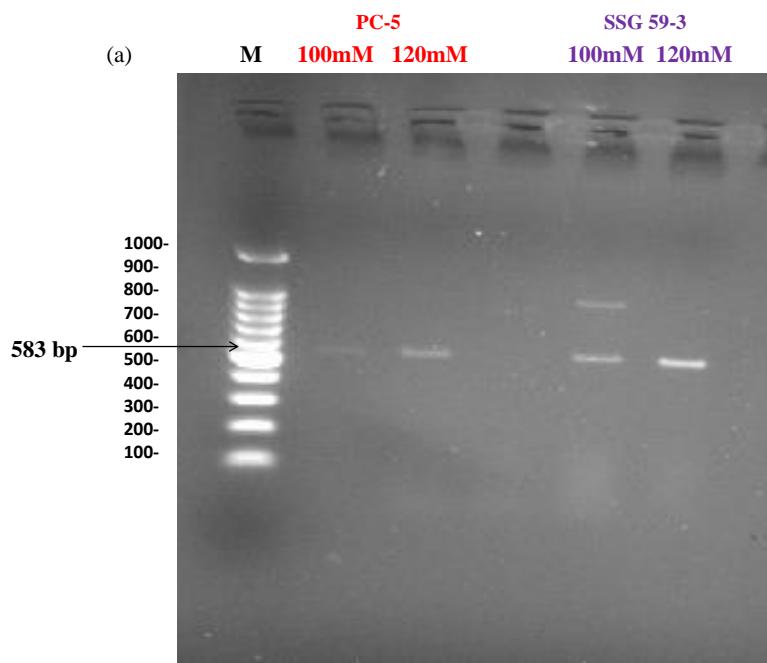

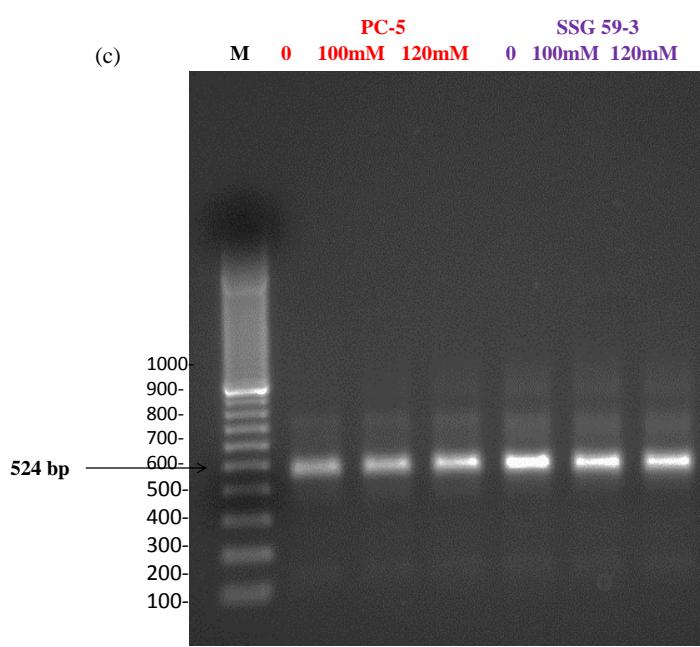

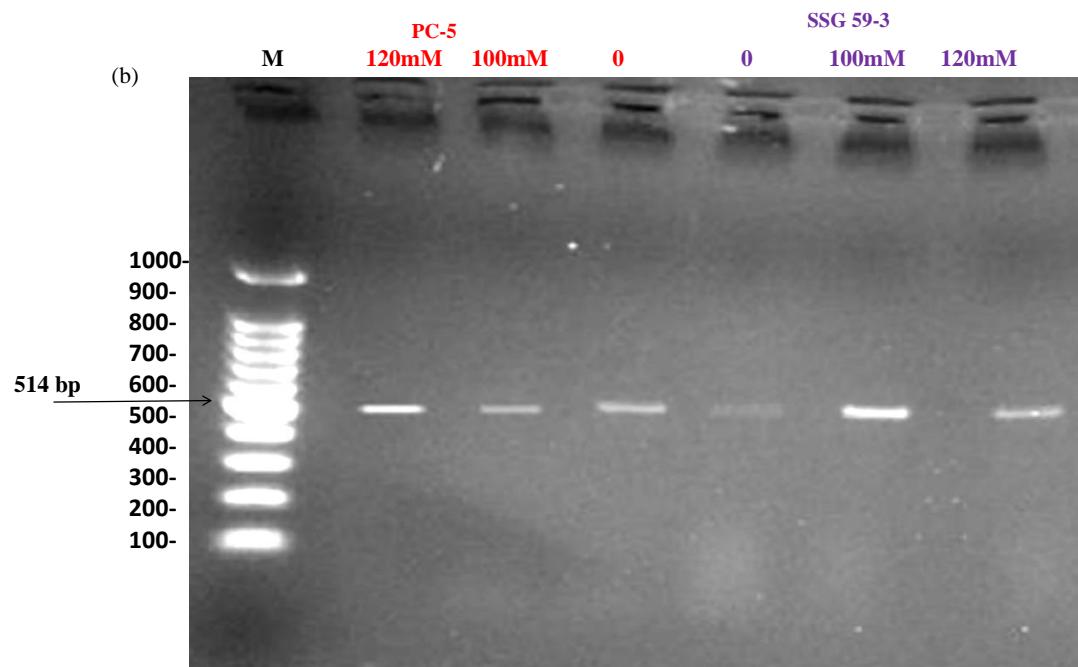

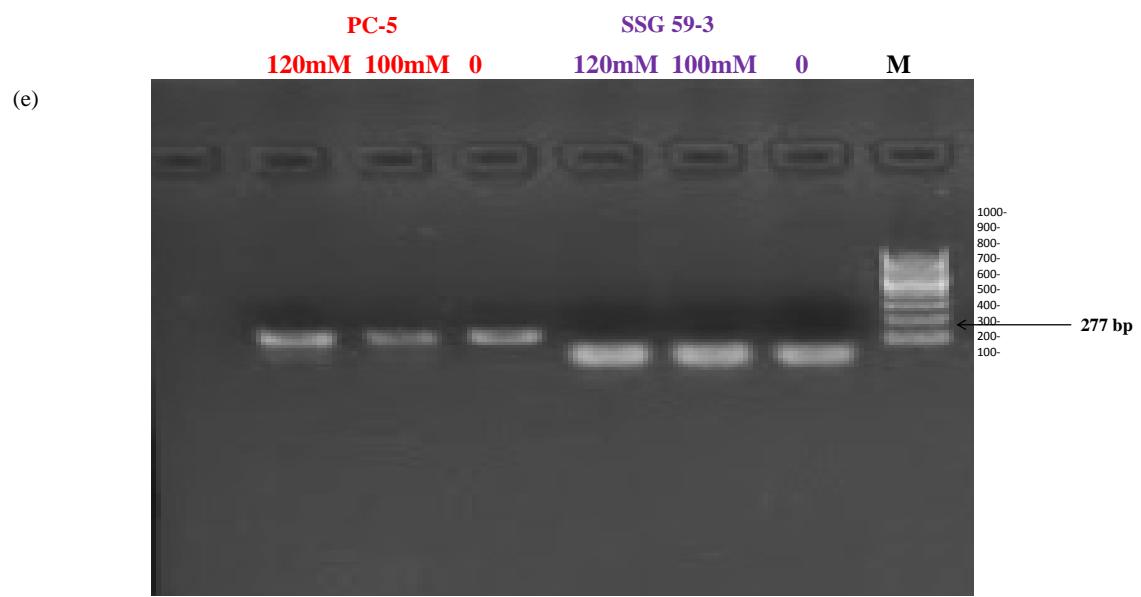

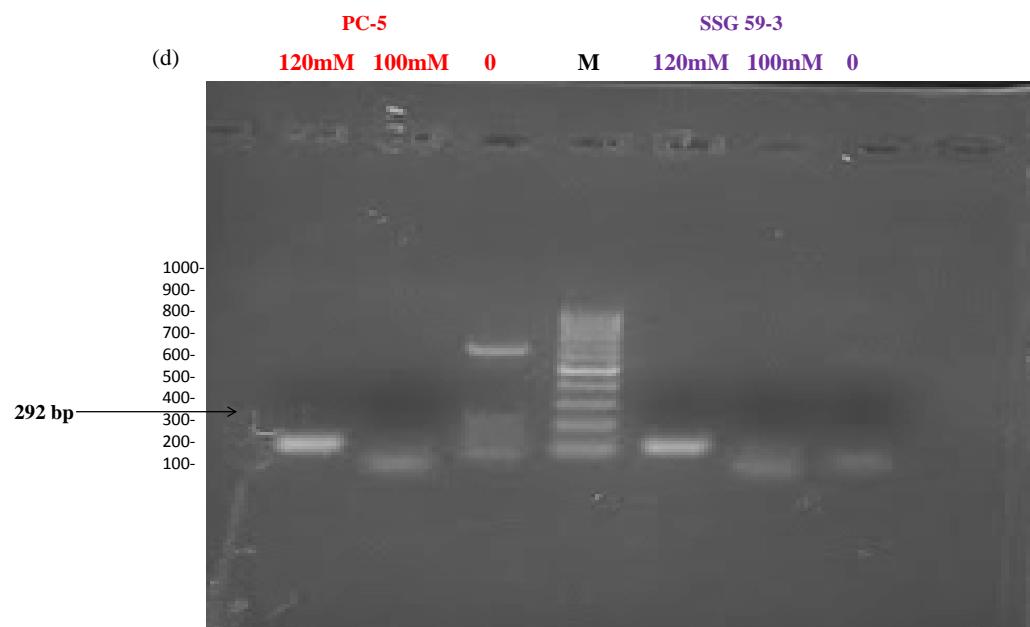

Figure S7. Test weight (g) in sorghum genotypes

C.D. 1.808

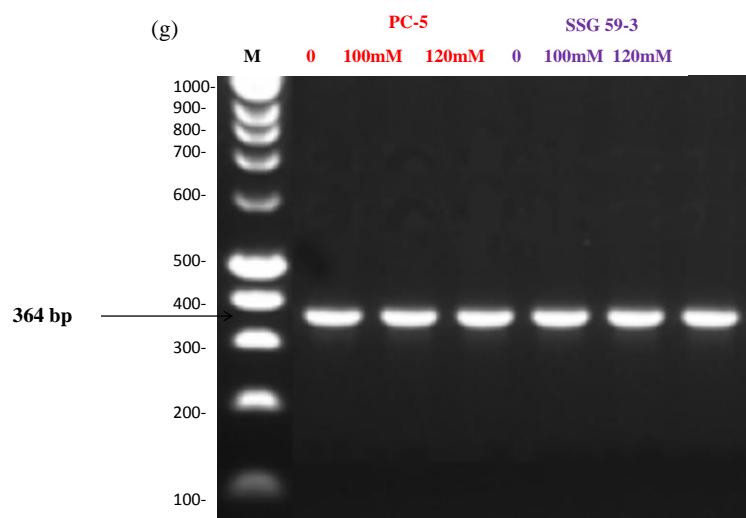

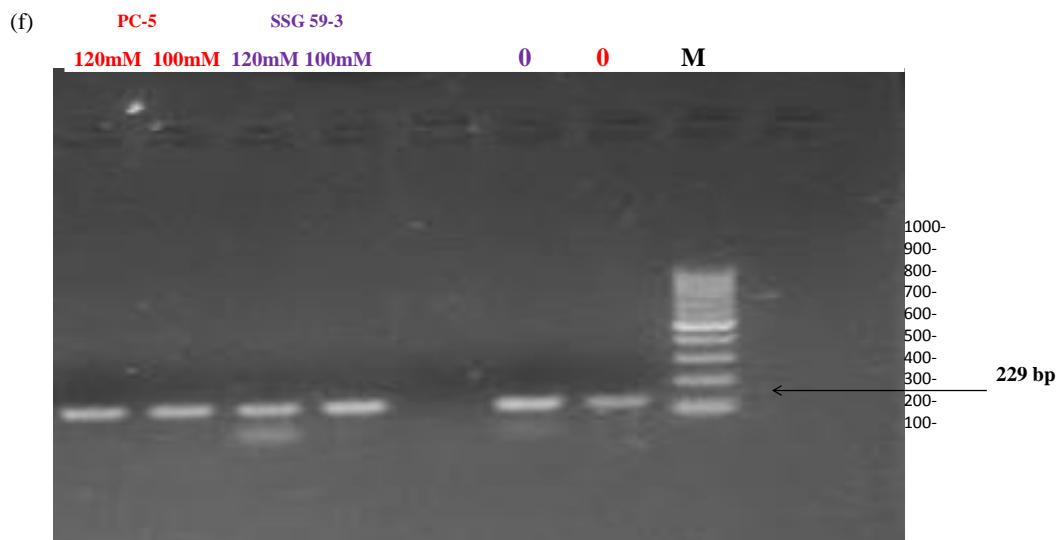

Figure S8. Semi-quantitative RT-PCR analysis of (a) Sucrose synthase (*SS*), (b) granule-bound starch synthase (*GBSS*), (c) cysteine protease (*XCP1*), (d) α -amylase synthesis (α -*amy*), (e) sodium proton antiporter (*NHX-1*), (f) vacuolar proton pyrophosphatase (*VPPase-I*), (g) actin (*Act-1*) and their relative quantification using densitometry, M: molecular marker.
