

Figure S3. Representative results of test-pollination under UV fluorescence microscopy. (A) Compatible pollination of the stigma from #83 'Taibyou apolo 60' (*SUI1-2/SUI1-10*) with the pollen from $S^{24}t$ (*PUI1-1/PUI1-1*). (B) Incompatible pollination of the stigma from #1 'Mainoumi' (*SUI1-2/SUI1-11*) with the pollen from $S^{24}t$. Scale bars, 100 μ m.
