

Supplementary File 1

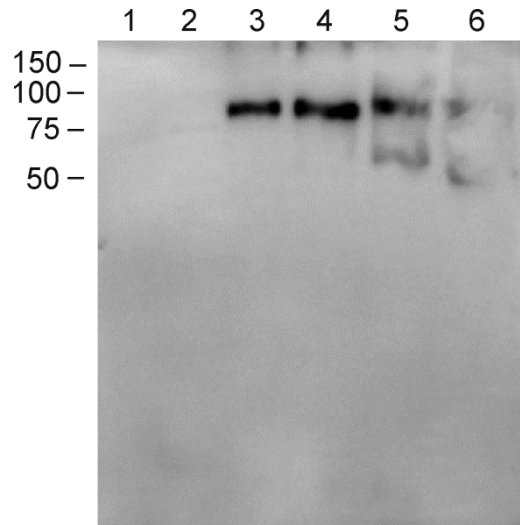

Figure S1. Western blot of proteins isolated from *N. benthamiana* plants infiltrated with pEff-Flg-RBD on days 3, 4, 5 and 6 after infiltration.

Lane 1, total proteins isolated from non-infiltrated leaf;

Lane 2, molecular weight marker (sizes are shown in kD);

Lanes 3-6, total protein isolated from leaf infiltrated with pEff-Flg-RBD on days 3, 4, 5 and 6 after infiltration

Western blotting was performed using anti-flagellin antibodies.
