

Figure S1. The daily dynamics in photosynthetic rate of *M. lutarioiparius* in HG. The \pm SE (error bars) for each time were calculated within the 5 leaves measured repeatedly.

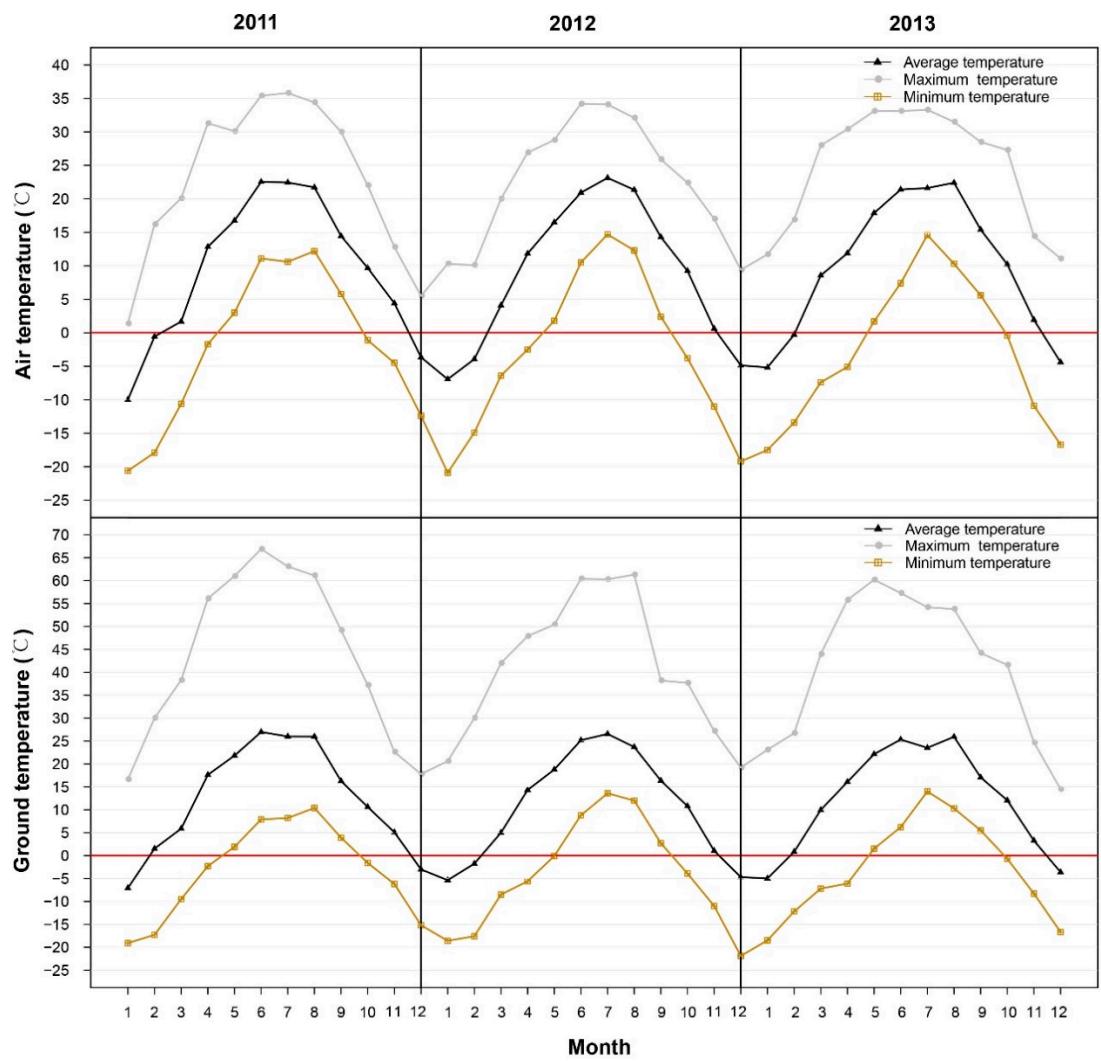

Figure S2. Extreme and average air temperature and ground temperature in HG from 2011 to 2013

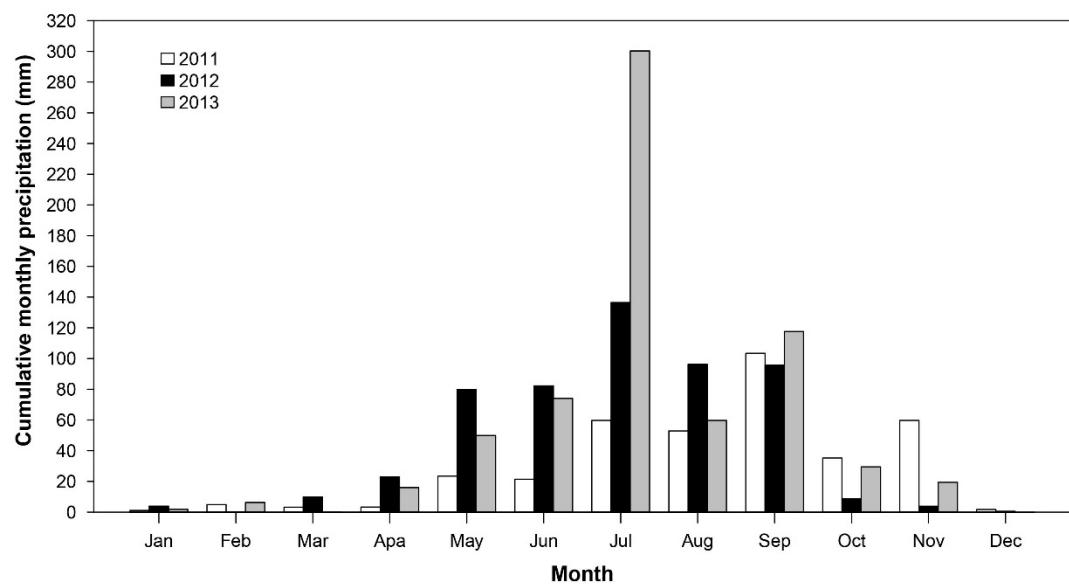

Figure S3. Cumulative monthly precipitation in HG from 2011 to 2013

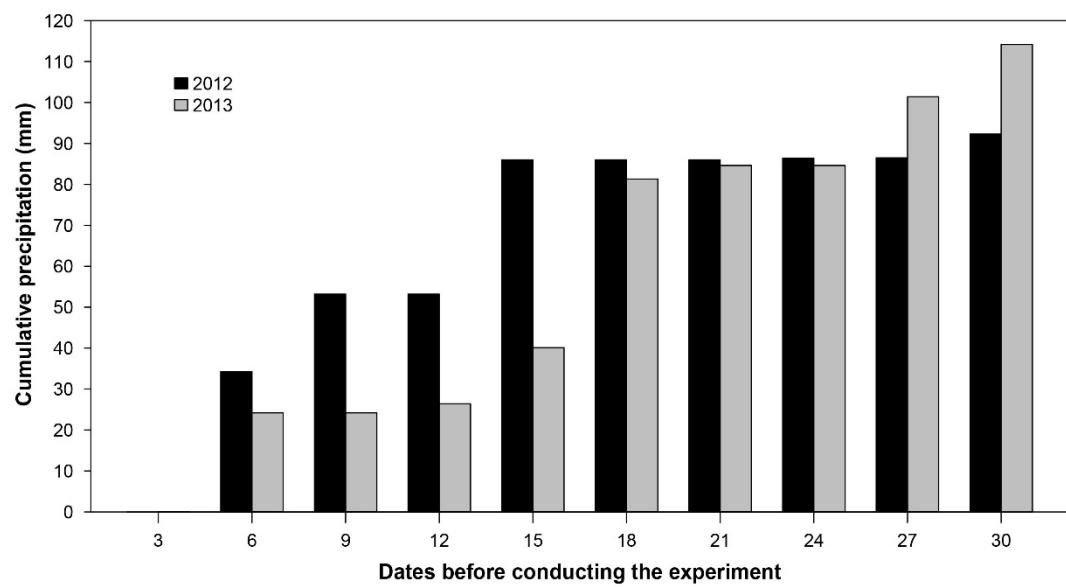

Figure S4. Cumulative precipitation before the measurement of photosynthetic parameters in 2012 and 2013

Table S1. The origin of 41 *M. lutarioriparius* populations and the times collected

Populations	Collection sites	Longitude(E)	Latitude(N)	Collection time
HG01	Yiyang, Hunan	112°19'24.43"	28°37'17.41"	2010

Table S2 The annual count of days with extreme temperature d from 2011 to 2013

	Air temperature		Ground temperature	
	2011.10-2012.5	2012.10-2013.5	2011.10-2012.5	2012.10-2013.5
The annual count of days with minimum temperature below 0 degree	132	138	156	155
The annual count of days with average temperature below 0 degree	91	87	81	79
The annual count of days with maximum temperature below 0 degree	28	20	8	3
