Cultural Diseases and Disorders	Explanation
Aire/Malaise	It is a strong headache, together with intense muscle sprains. “Malaire” (which can be literally traduced by “malevolent wind”), is said to be caused by weird air streams, warm or cold, coming down from the mountains, and affecting people by direct contact (De la Cruz <i>et al.</i> , 2007).
Susto/Espanto	It is an intense fright, affecting children and adults, caused by spirits from the wild (mountains and rivers), affecting and taking control over people (De la Cruz <i>et al.</i> , 2007).
Antimonia/Gentil/Viejo/Antiguo o Tacsho	Bone or skin infection due to contact with bones from pre-Inca tombs called "morada de gentiles"

It is a gaze or evil eye of a dead person, generally in children, in such a way that the belief is that, in a family, a person when dying, out of affection, can leave a glance at the boy or girl, and in that case they have to be healed through the liberation of the spirit of the dead.

Tijte

Skin irritation caused by coming into contact with certain species of plants with cross-leaf growth.
