

## Supplementary Information

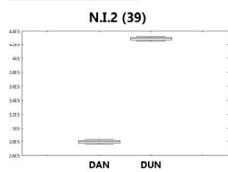

**Figure S1.** Partial least-square discriminant analysis (PLS-DA) of the metabolites in Danma (DAN) and Dunggeunma (DUN) leaves harvested at different times, analyzed by (A) GC-TOF-MS and (B) UHPLC-Orbitrap-MS/MS ( $\blacktriangle$ : DAN,  $\bullet$ : DUN,  $\blacktriangle$ ,  $\bullet$ , June;  $\blacktriangle$ ,  $\bullet$ , July;  $\blacktriangle$ ,  $\bullet$ , August)

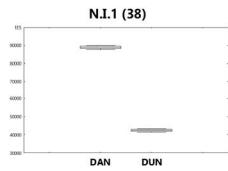

**Figure S2.** OPLS-DA score plots for metabolites in DAN and DUN leaves collected in August, obtained using (A) GC-TOF-MS and (B) UHPLC-Orbitrap-MS/MS data. (▲: DAN, ●: DUN).

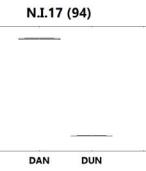

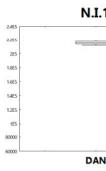

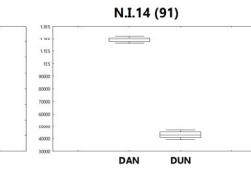

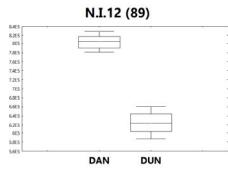

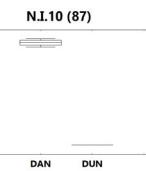

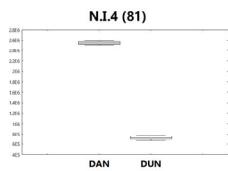

**(A) DUN > DAN**

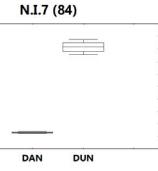

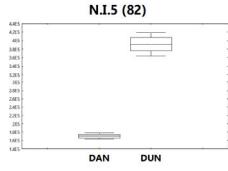

**DAN > DUN**

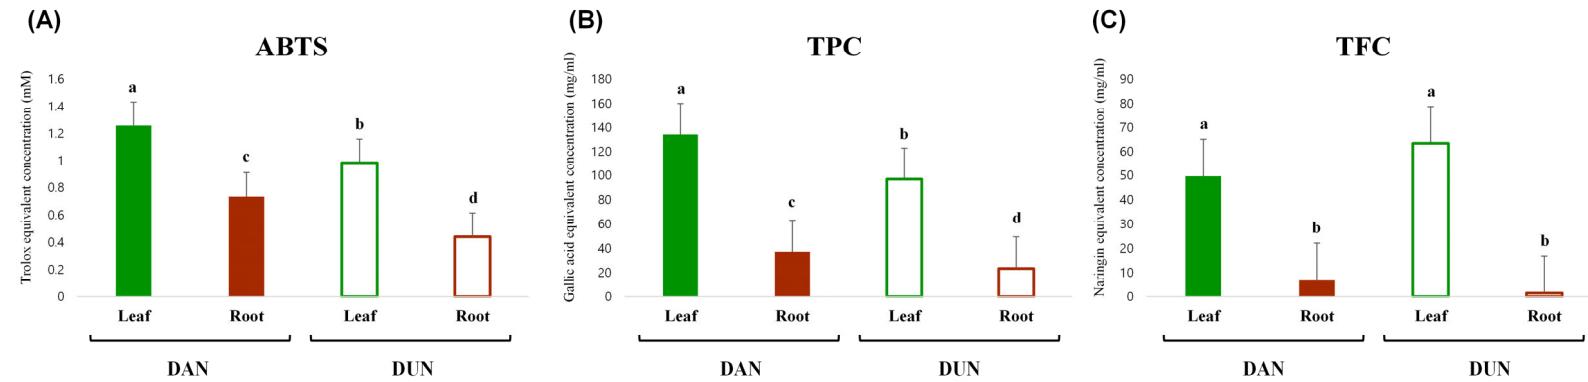

**(B) DAN > DUN**

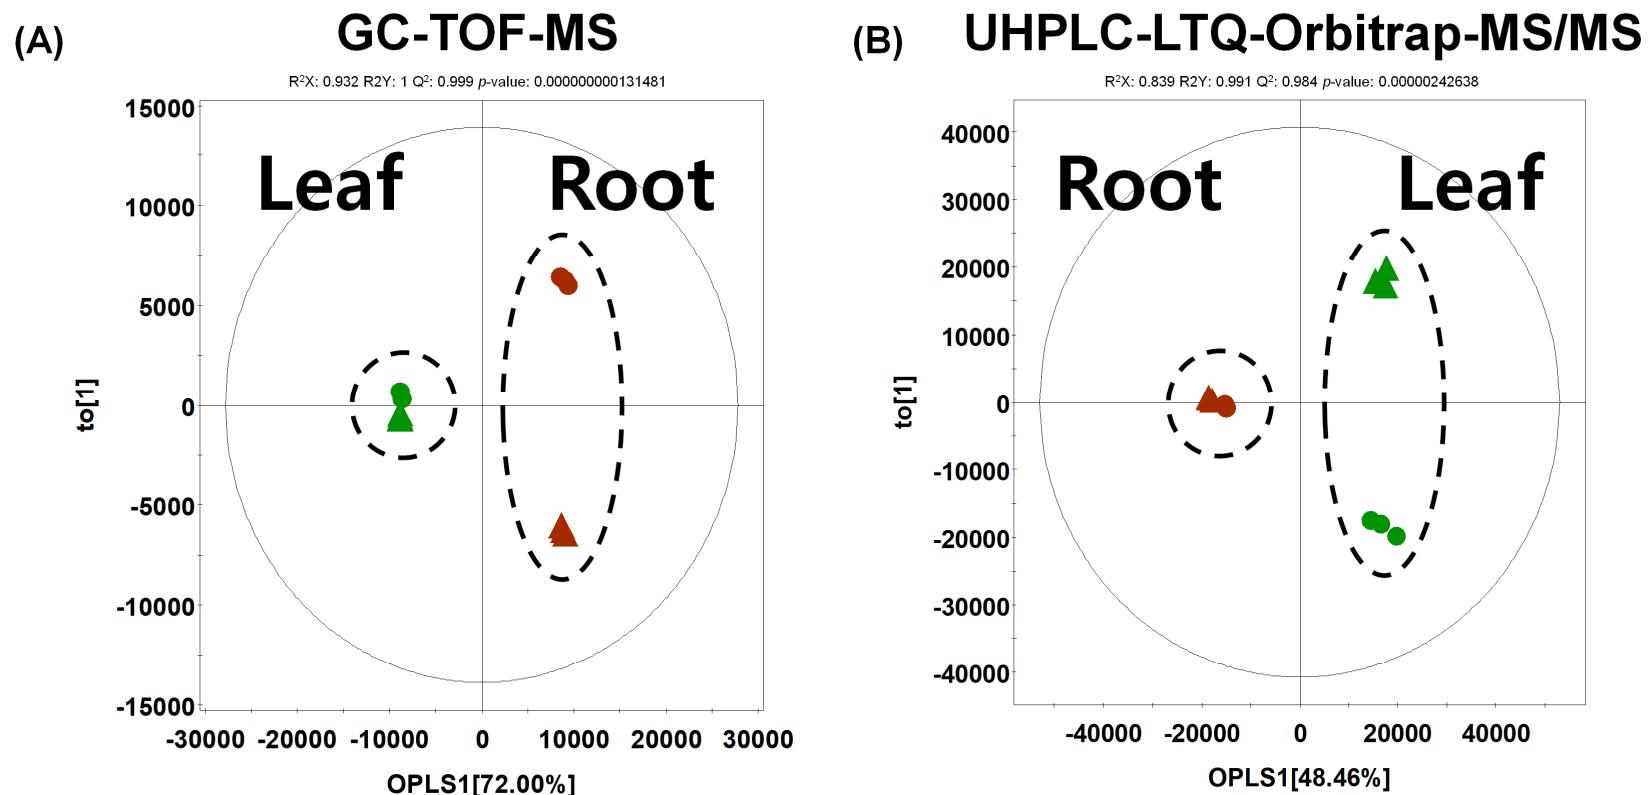

**DUN > DAN**

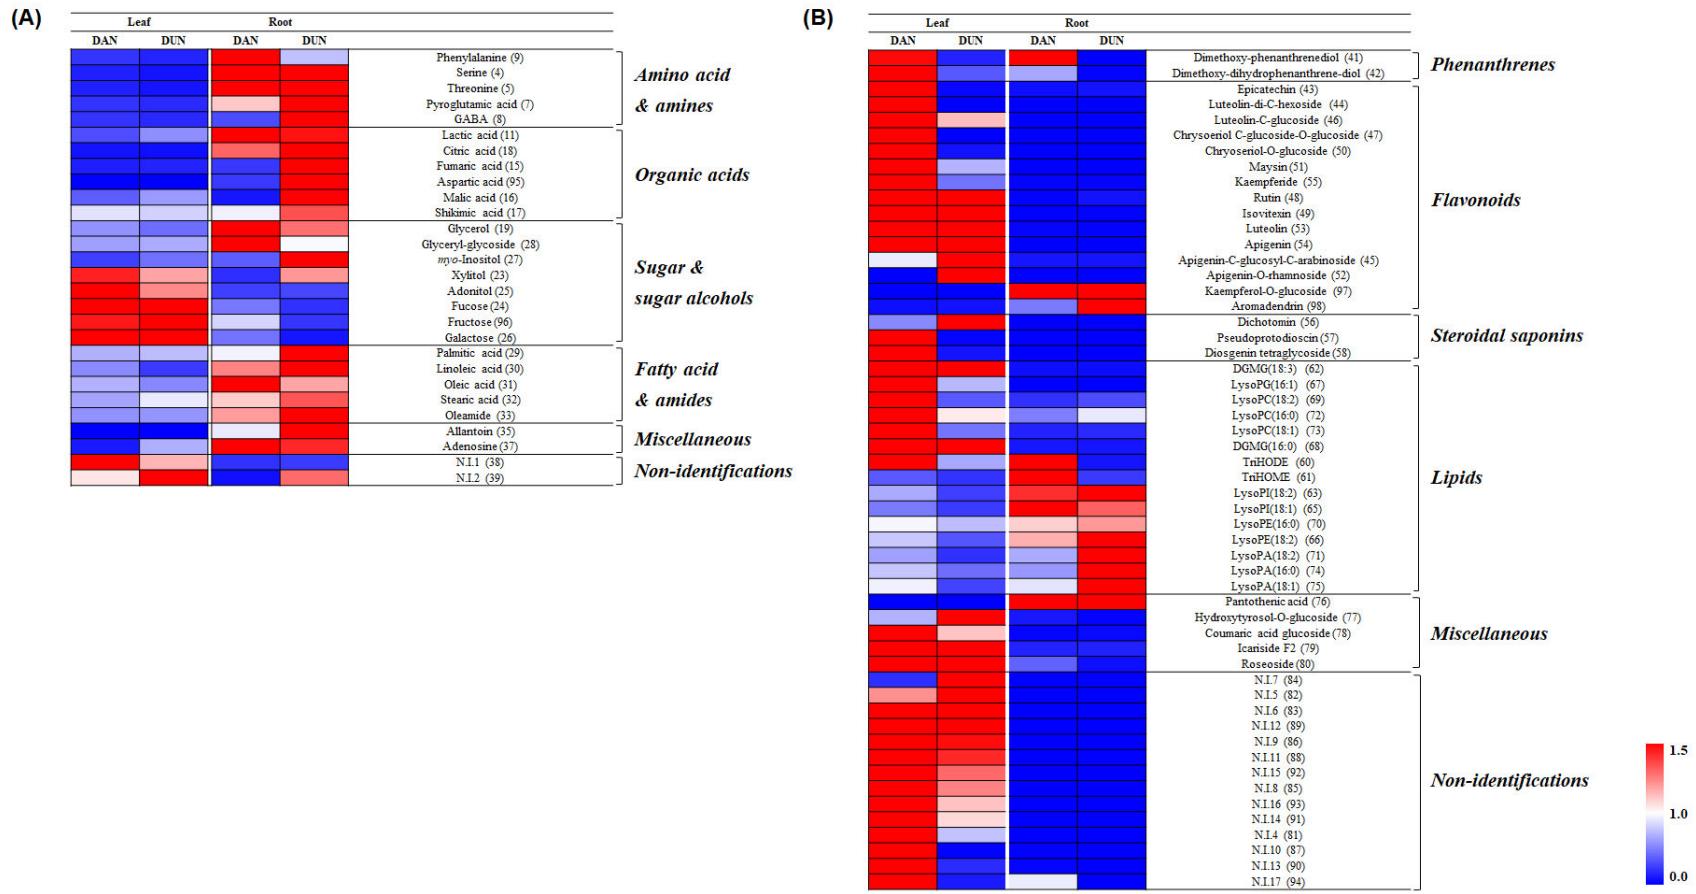

**Figure S3.** (A, B) Box and whisker plots showing the relative abundances of the non-identified compounds in DAN and DUN leaves collected in August, obtained using (A) GC-TOF-MS and (B) UHPLC-Orbitrap-MS/MS data. (Variable important projection (VIP) value > 2.5 and  $p < 0.05$  in OPLS-DA).

**Figure S4.** Bioactivities of DAN and DUN leaf and root extracts; (A) antioxidant activity based on ABTS radical scavenging capacity, (B) total phenol content (TPC), and (C) total flavonoid content (TFC). Values are averages of triplicate measurements ( $n=3$ ). Different letters are significantly different according to Duncan's multiple-range test ( $p < 0.05$ ).

**Figure S5.** OPLS-DA score plots for the metabolites in DAN and DUN leaves and roots collected in August, constructed using (A) GC-TOF-MS and (B) UHPLC-Orbitrap-MS/MS data. ( $\blacktriangle$ , DAN, leaf,  $\bullet$ : DUN, leaf,  $\blacktriangle$ : DAN, root,  $\bullet$ : DUN, root).

**Figure S6.** Heatmap of significantly different primary and secondary metabolites in DAN and DUN leaves and roots derived using (A) GC-TOF-MS and (B) UHPLC-Orbitrap-MS/MS data .

**Table S1.** Discriminative metabolites in DAN and DUN leaves obtained in June, July, and August derived from the PLS-DA model of the GC-TOF-MS data.
