

**Figure S1.** Effects of volatile organic compounds of *Serratia rubidaea* Mar61-01 on *Botrytis cinerea* mycelial growth. a) Control, b, c and d) treatment with *Serratia rubidaea* Mar61-01. Arrows indicate twisting in the hyphae and B) indicate shrinkage in the colony of fungal pathogen.

**Figure S2.** Effects of prodigiosin on mycelial growth of fungal pathogen a) Control and b) inhibited growth around the holes in treatment with prodigiosin

**Figure S3.** Disease severity on a and b) +prodigiosin+*B. cinerea* (BP) treatment and c and d) mock-treated control, 72 and 96 h after inoculation respectively.
