

Figure S1. Isozyme profile of CAT from shoots and roots of *P. miliaceum* under treatment with aqueous extract and in control.

Figure S2. Isozyme profile of APX from shoots and roots of *P. miliaceum* under aqueous extract treatment and in control.

Figure S3. Isozyme profile of SOD from shoots and roots of *P. miliaceum* under aqueous extract treatment and in control.

Figure S4. Isozyme profile of POD from shoots and roots of *P. miliaceum* under aqueous extract treatment and in control.
