

Table S4. Results of the principal component analysis of the morphometric parameters of seeds.

Parameter	Components		
	PC1	PC2	PC3
Length (L)	−0.471	0.579	0.563
Width (W)	−0.568	−0.223	0.233
Thickness (T)	−0.471	0.390	−0.791
L/W ratio	0.485	0.681	0.051

Scores of the variables for the first three main axes are shown. The variables that contributed most for the axes are highlighted in bold.
