

Figure S1. Mean Distribution of Predicted Gains of Selected Superior Full-Sib Families. GY = mean grain yield; PE = popping expansion; 100GW = mean 100-grain weight; EL = mean ear length; ED = mean ear diameter; and FSF = full-sib family.

Figure S2. Distribution of selected superior full-sib families and means of parent populations. GY = mean grain yield; PE = popping expansion; UENF-14 = Population UENF-14; and Synth = UENF-synthetic.
