The author would like to make the following correction to the article by Hoover (2020):

The symbol “ \rightarrow ”, first defined as “is weakly exogenous for” in the first line of the third paragraph of Section 4.3, was inadvertently and systematically converted in production to the symbol “ α ”. Every instance in which symbol “ α ” is used to denote weak exogeneity should be changed to “ \rightarrow ”.

The Editorial Office would like to apologize for any inconvenience caused to the readers by this change. The change does not affect the scientific results. The manuscript will be updated and the original will remain online on the article webpage.

Conflicts of Interest: The author declares no conflict of interest.
