In the original publication [1], there were mistakes in Tables 3–5 as published.

The number of the ‘15–19 years’ row in Table 3 was 31 instead of 30. The number and percentage for the ‘Not satisfied’ row in Table 4 were 0 instead of 1. The number of the ‘Satisfied’ row in Table 4 was 83 instead of 84. A ‘No answer’ row in Table 4 was added, with the number and percentage of 1. The number in the ‘Somewhat easy’ row in Table 5 was 28 instead of 29. The corrected Tables 3–5 appear below.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.

Table 3. Clinical experience years of the participants at O1 ($n = 153$).

Clinical Experience Years as a Professional	Number	Percentage (%)
<5 years	20	13
5–9 years	22	15
10–14 years	17	11
15–19 years	31	20
20–24 years	31	20
≥25 years	32	21
Total	153	100

Table 4. The degree of satisfaction perceived by the participants after O1 ($n = 153$).

Degree of Satisfaction	Number	Percentage (%)
Not satisfied at all	0	0
Not satisfied	0	0
Somewhat not satisfied	4	3
Somewhat satisfied	29	18
Satisfied	83	55
Very satisfied	36	23
No answer	1	1
Total	153	100

Table 5. Training difficulty perceived by the participants after O1 ($n = 153$).

Training Difficulty	Number	Percentage (%)
Very difficult	15	10
Difficult	35	23
Somewhat difficult	67	43
Somewhat easy	28	19
Easy	5	3
Very easy	3	2
Total	153	100
