

Supplementary

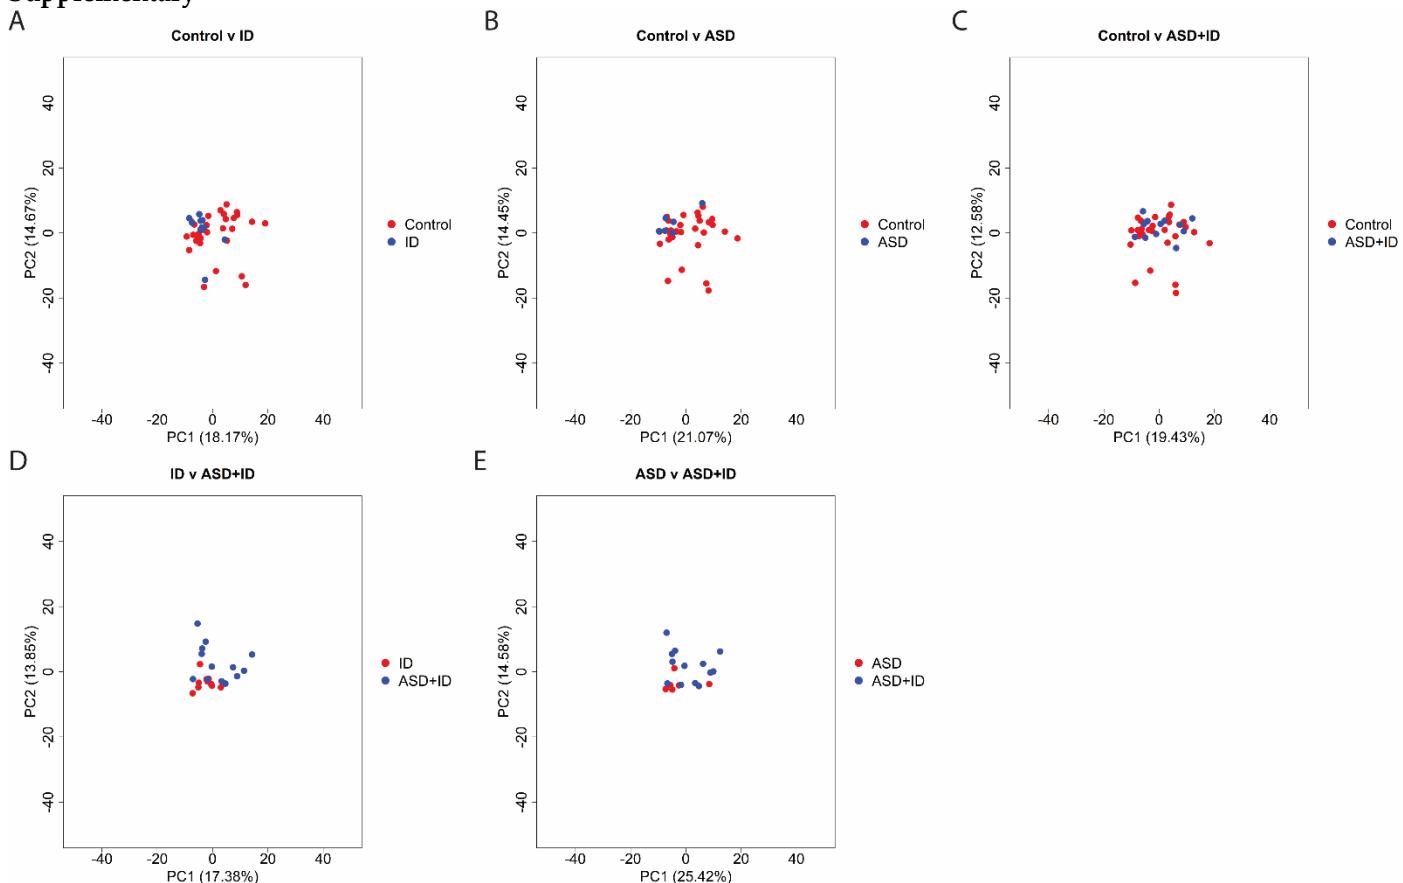

Figure S1. Based on serum miRNAs transcription profile, the PCA analysis revealed no identifiable pattern of the different TANDs in any of the comparisons. A. Controls (TSC without TANDs) and Intellectual Disability (ID). B. Controls (TSC without TANDs) and Autism Spectrum Disorder (ASD). C. Controls (TSC without TANDs) and ASD+ID. D. ID and ASD+ID. E. ASD and ASD+ID. X-axis: Principal Component 1 (PC1). Y-axis: Principal Component 2 (PC2).

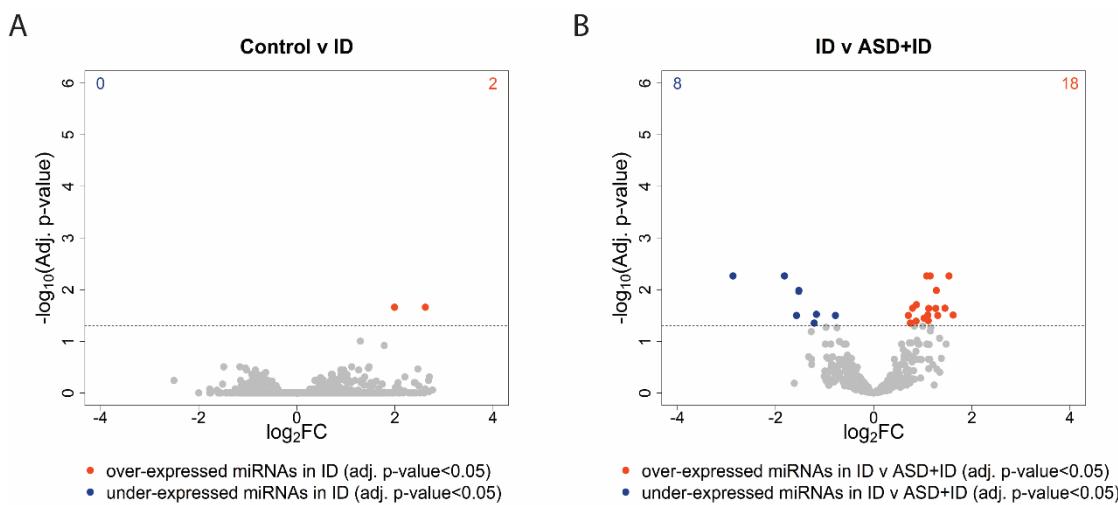

Figure S2. Volcano plot showing the differentially expressed miRNAs (adjusted p-value<0.05). A. Comparing controls (TSC without TANDs) and Intellectual Disability (ID), a total of 2 overexpressed (red) miRNAs were found, and no miRNAs were underexpressed (blue). B. Comparing ID and ASD+ID, a total of 18 overexpressed (red) and 8 underexpressed (blue) miRNAs were found. x-axis: miRNAs expression levels in log2FoldChange (log2FC) scale; y-axis: significance levels in -log10(Adj. p-value) scale.

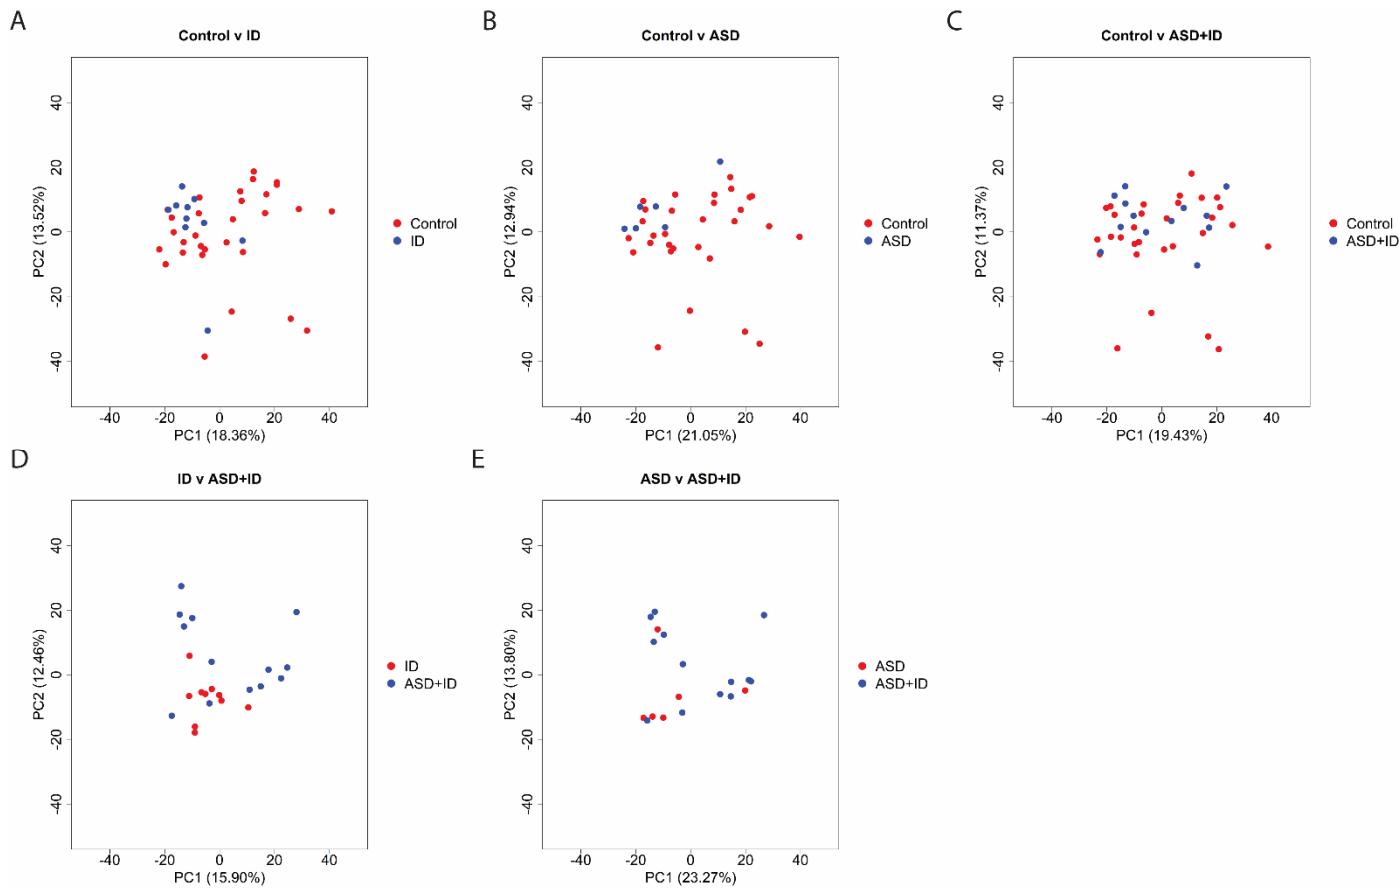

Figure S3. Based on serum isomiRs transcription profile, the PCA analysis revealed no identifiable pattern of the different TANDs in any of the comparisons. A. Controls (TSC without TANDs) and Intellectual Disability (ID). B. Controls (TSC without TANDs) and Autism Spectrum Disorder (ASD). C. Controls (TSC without TANDs) and ASD+ID. D. ID and ASD+ID. E. ASD and ASD+ID. X-axis: Principal Component 1 (PC1). Y-axis: Principal Component 2 (PC2).

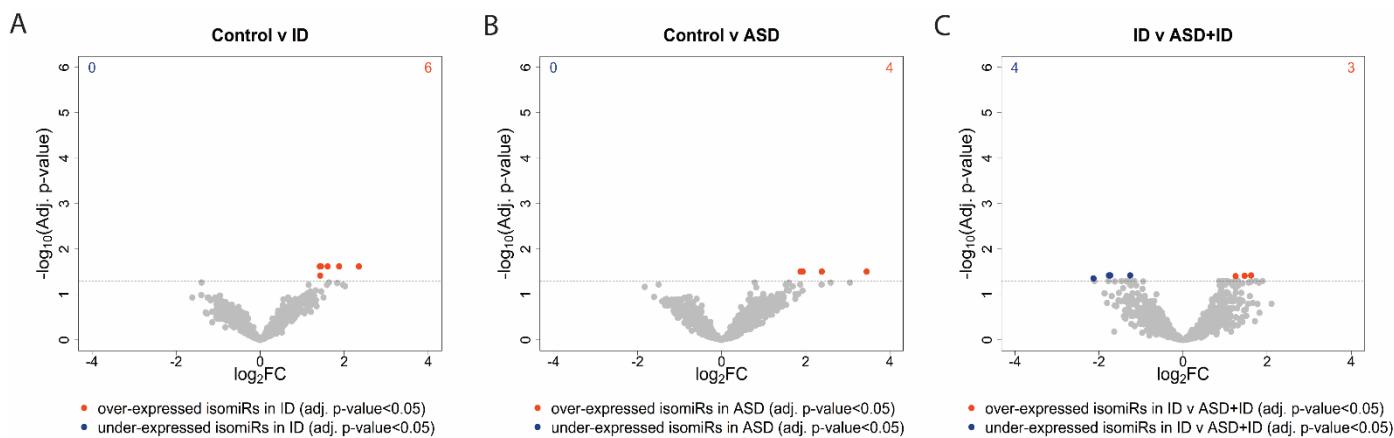

Figure S4. Volcano plot showing the differentially expressed isomiRs (adjusted p-value<0.05). A. Comparing controls (TSC without TANDs) and Intellectual Disability (ID), a total of 6 overexpressed (red) isomiRs were found, and no isomiRs were underexpressed (blue). B. Comparing controls and Autism Spectrum Disorder (ASD), a total of 4 overexpressed (red) and no underexpressed (blue) isomiRs were found. C. Comparing ID and ASD+ID, a total of 3 overexpressed (red) and 4 underexpressed (blue) isomiRs were found. x-axis: isomiRs expression levels in log2FoldChange (log2FC) scale; y-axis: significance levels in -log₁₀(Adj. p-value) scale.

Table S1: Clinical information of Controls (TSC without TANDs), Intellectual Disability (ID), Autism Spectrum Disorder (ASD) and ASD+ID cases at timepoint V1.

ID	PA Diagnosis	Sex	Age (days)	Used for	TSC mutation	Seizures
1	Control	Male	35	RNA-seq	TSC2	No
