

Supplementary Information S1

Analysis of the Factorial Structure and Reliability of the Social Determinants of Mental Health (SDMH) Questionnaire for Young Adults

**Mónica Roncancio-Moreno, Rita Patricia Ocampo-Cepeda, Walther M. Zúñiga and Arcadio
de Jesús Cardona-Isaza**

Social Determinants of Mental Health (SDMH) Questionnaire for Young Adults (between 18 and 28 years old)

Participant data

Name: _____ Date of birth: _____

Structural Determinants

Structural determinants include socioeconomic position, sex and ethnicity. Socioeconomic position depends on education, occupation and economic income.

Differential approach data

Socioeconomic Level

1. Socioeconomic Level: _____

Monthly Income: _____

Sex, gender identity and sexual orientation.

2. Sex.

- Man (0)
 Woman (1)

Sexual orientation

3. Sexual orientation refers to the sexual, affective or erotic attraction that a person feels towards other people (of the same gender or of other genders). Nowadays, different forms of orientation are recognized (beyond heterosexual, homosexual and bisexual), including people who are not attracted to any of the genders. Regarding your sexual orientation, what do you recognize yourself as?

Ethnic affiliation

4. Do you identify yourself as a member of any ethnic group? Which one?

Territory

5. Where have you lived the majority of your life? Indicate the name of the country, state or city (as the case may be):

Vital situation

6. Who have you shared your home with most of your life?

- Your origin family (mother, father, brothers, grandparents) (1)
- Other relatives (2)
- Other people, non-relatives (3)
- Your partner and children (4)
- Just your partner (5)
- Just your children (6)
- Nobody else (7)

Education

7. What is your current education level?

- High School (1)
- A technical career (2)
- A technological career (3)
- A university career (4)

Marital status

8. What is your marital status?

- Single (1)
- Married (2)
- Free union (3)
- Divorced (4)
- Widow / Widower (5)

9. Are you currently in a relationship?

- Yes (1)
- No (2)

Health coverage

10. Do you currently have social health insurance?

- Yes (1)
- No (0)

Intermediate Determinants

Intermediate determinants involve the biological and psychosocial factors that condition health and health systems, such as living conditions, people's behaviors and barriers to adopting healthy lifestyles.

Protective factors

Perception of well-being in relationships and with the environment.

Our daily life takes place in different settings such as the neighborhood, the workplace, the educational institution, etc. These settings present us with challenges and opportunities for development; in them, we meet people with whom we establish relationships that can be cooperative and supportive or competitive and tense. The way we feel in these places and the nature of the relationships we establish play a very important role in our mental health, well-being and quality of life.

Well-being in different environments

11. For each of the following environments, indicate HOW COMFORTABLE YOU FEEL:

Environment	I feel very comfortable (6)	It doesn't generate tensions or problems for me (5)	It is indifferent to me (4)	It generates a lot of tensions and problems for me (3)	I find it uncomfortable and/or unpleasant (2)	I feel it is harmful for me (1)	Not applicable (0)
Home							
Neighborhood							
Study place							

12. For each one of these environments, indicate how good your relationships with people are:

Environment	Close and good relations (6)	Distant but good relationships (5)	Relationships barely existent (4)	Distant but bad relationships (3)	Close and bad relationships (2)	Not applicable (No relationships) (1)
Religious community						
Music, sports, recreational or civic group						

Social support expectations

13. For each one of the following people, indicate how much you think they would support you on a difficult situation.

Person/ Response	They would give me unconditiona l support	They would support me depending on the situation	They wouldn't support me	They wouldn't show interest	I fear that instead of supporting me, they would make things harder	I don't know what their reaction would be	Not applicable
	(6)	(5)	(4)	(3)	(2)	(1)	(0)
Couple							
Relatives							
Friends							

Coping strategies

14. When you find yourself in an overwhelming situation that causes you tension, discomfort or emotional pain, what do you tend to do?

- You try to find a solution (5)
- You postpone finding of a solution (4)
- You try to distract yourself to not think about it (3)
- You do nothing about it and wait for it to “happen” on its own. (2)
- You worry and suffer without being able to do anything else. (1)

Positive behaviors and sociocultural support

Attendance at counseling or therapy

15. Indicate how often you engage in the following behaviors (check only one option per row):

Behavior/ Frequency	Everyday	Almost every day of the week	One or two days per week	One or two times per month	Very rarely	Never
	(6)	(5)	(4)	(3)	(2)	(1)
Sharing recreational moments with your family						
Sharing recreational moments with your friends						

Psychosocial life skills

16. Indicate how often you do or feel the following:

Situation / Frequency	Always (5)	Most of the time (4)	Half of the time (3)	Very rarely (2)	Never (1)
I know my strengths, weaknesses, aspirations and expectations; I am clear about what I want in life and the personal resources I must achieve it.					
I can “put myself in the place” of another person, understand his or her point of view and feelings to respond in a supportive way, according to the circumstances.					
I can express emotions and feelings in a way that is appropriate to different contexts and circumstances based on the recognition of the meaning and importance they have for me and for other people.					

Risk factors

Concerns and emotional distress

17. For each of the following areas of life, indicate how much they generate concern and emotional discomfort for you:

Area / Response	It generates a lot of concern and emotional discomfort (1)	It generates a lot of concern but not discomfort (2)	it doesn't cause me any concern (3)	Instead, it gives me peace of mind and well-being (4)	Not applicable (0)
Your life as a couple					
Your family life					
Your social life					
Your financial situation					

18. If there is any other aspect of your life causing concern or emotional discomfort, please briefly mention it:

19. What causes difficulty, worry, or emotional discomfort for you regarding college or school life?

At different times and under various circumstances, we are faced with situations or events that require us to put in additional effort in both the development of our daily activities and the construction of meaning and purpose in our lives (life project). Often, these events cause us pain or emotional discomfort so intense that it can last over time and have a lasting impact on the way we act, feel, or think. In mental health care, it is important to recognize the existence of such experiences and the impacts they may have caused.

Physical health issues

20. Do you suffer from any chronic health conditions (conditions that last for years and require ongoing treatment or monitoring, such as diabetes, asthma, or cancer, among others)?

- Yes (1)
- No (0)

21. Have you received an accurate diagnosis?

- Yes (3)
- No (2)
- Not applicable (0)

Functional diversity

22. Do you experience functional diversity (e.g., blindness or low vision, hearing loss, etc.)?

- Yes (1)
- No (0)

23. Please indicate which of the following functional diversity situations apply to you (you can select as many options as needed):

- Visual (1)
- Auditory (2)

- | | |
|--------------------------------------|-----|
| <input type="radio"/> Motor | (3) |
| <input type="radio"/> Intellectual | (4) |
| <input type="radio"/> Other | (5) |
| <input type="radio"/> Not applicable | (0) |

Mental health diagnosis

24. Have you ever been diagnosed with a mental health condition?

- | | |
|---------------------------|-----|
| <input type="radio"/> Yes | (1) |
| <input type="radio"/> No | (0) |

25. What diagnosis were you given?

26. Please indicate if you have received or are currently receiving any type of treatment (you may select as many options as necessary).

Type of treatment / Response	Ongoing	Finished	Not applicable
	(2)	(1)	(0)
Psychotherapeutic			
Pharmacological			
Other			

27. Do you feel that the treatment you received has led to any improvement or relief?

Type of treatment / Response	Yes	No	Not applicable
Psychotherapeutic			
Pharmacological			
Other			

28. Does this condition limit your ability to carry out and enjoy your daily activities?"

- | | |
|--|-----|
| <input type="radio"/> All the time | (1) |
| <input type="radio"/> Often | (2) |
| <input type="radio"/> From time to time | (3) |
| <input type="radio"/> Very few times | (4) |
| <input type="radio"/> It doesn't set any limitations | (5) |
| <input type="radio"/> Not applicable | (0) |

Discomfort due to trauma

29. Have you ever faced overwhelming situations that caused you significant stress, discomfort, or emotional pain (e.g., a significant loss, being in danger, a sudden and abrupt life change, etc.)?

- Yes (1)
- No (0)

30. How long ago did these stressful situations that caused you great tension, discomfort or emotional pain occur (check only one option)?

- Many years ago (1)
- More than six months ago (2)
- In the last six months (3)
- Currently occurring (4)
- Not applicable (0)

Violence

31. Have you been a victim of any of the following forms of violence (or abuse)? (You may check as many options as you consider necessary).

- Physical (1)
- Sexual (2)
- Psychological (3)
- Digital (on social media) (4)
- Bullying (5)
- Forced displacement (6)
- I have not been a victim of any violence (0)

Suicidal behavior

32. Some people may feel like they 'can't take it anymore' or feel emotionally exhausted when facing situations that cause intense suffering (such as pain, shame, helplessness, etc.) and feel that finding a satisfactory solution is beyond their reach. Have you ever faced an overwhelming situation? (Please check as many options as you wish).

Option / Response	Yes (1)	No (0)
Have you seriously considered that ceasing to exist would be a solution?		

Drug use

33. Indicate the frequency of use for each of the following substances (please check only one option per row):

Environment / Frequency	Daily (4)	Weekly (3)	Occasionally (2)	Sporadically (1)	I don't consume this drug (0)
Alcoholic beverages (fermented or distilled)					
Non-prescription drugs (e.g., psychiatric drugs, etc.)					

34. As a result of using any of the substances listed above, have you ever experienced the following? (Please check only one option per row).

Response	Yes (2)	No (1)	Not applicable (0)
Conflicts with your family			
Conflicts with your couple			
Conflicts with your friends			
Economic problems			

Problematic use of the internet

35. Indicate how often you engage in each of the following activities (please check only one option per row):

Activity / Frequency	Daily (4)	Weekly (3)	Occasionally (2)	Sporadically (1)	I don't do this activity (0)
Play video games					
Watching sexual content on the internet					

36. As a result of engaging in the activities mentioned in the previous question, have you ever experienced the following? (Please check only one option per row).

Response	Yes (2)	No (1)	Not applicable (0)

Academic problems			
Legal problems			

Additional information

37. In your own words, how do you feel about your current mental health?

38. Indicate with whom you feel comfortable discussing the following mental health topics (you may check as many options as you find necessary).

Topic / People	With my couple	With relatives	With my friends	With study colleagues	With coworkers	With superiors or teachers	With people in my community (neighborhood church, etc.)	With a mental health professional	I wouldn't talk about it with anyone
What is mental health and why is it important in daily life?									
The importance of promoting emotional well-being through the establishment of healthy interpersonal relationships.									

39. Do you know the steps you need to take to access counseling or professional help for mental health concerns?

Option / Response	Yes (1)	No (0)
At your study place		
At work		
At your health care institution		
Independently		

40. Mention three activities that bring you the most joy, vitality, and/or satisfaction.

Frequency of well-being and discomfort

Experiences of well-being, psychological discomfort, and physical symptoms over the past week.

41. In the PAST WEEK, how frequently have you experienced the following?

Experience / Response	All the time (5)	Frequently (4)	Occasionally (3)	Very rarely (2)	Haven't experienced it (1)
Nervousness or fear about many things					
Concerns or distress					
Worry, uneasiness, or uncertainty					
Hope, optimism, or illusion					
Eating much more or much less than usual					
Digestive problems					

Experiences of well-being, psychological discomfort, and physical symptoms over the past six months.

42. In the PAST SIX MONTHS, how often have you experienced the following?

Experience / Response	All the time (5)	Frequently (4)	Occasionally (3)	Very rarely (2)	Haven't experienced it (1)
Nervousness or fear about many things					
Difficulty concentrating or thinking clearly					
Confusion in decision-making					
Vitality or energy					
Hope, optimism, or illusion					

Thank you for your participation!

Prediction of Emotional Symptoms in the Last Six Months

A hierarchical regression was conducted to investigate whether well-being in different environments and risk and protective factors (intermediate factors in the survey) predicted negative emotional symptoms or distress in the last six months. Sex, age, and factors representing these components were included in the analysis.

The evaluated model was significant ($R^2 = 0.26$; $F = 24.716, p < 0.001$). The variables that contributed to the explained variance were fewer healthy lifestyle habits ($\beta = -0.14; t = -4.957, p < 0.001$; 95% CI = -0.28 to -0.124), higher levels of worry and emotional distress ($\beta = 0.23; t = 8.625, p < 0.001$; 95% CI = 0.41 to 0.66), greater suicidal behavior ($\beta = 0.23; t = 8.930, p < 0.001$; 95% CI = 1.47 to 2.30), drugs use ($\beta = 0.06; t = 2.351, p = 0.019$; 95% CI = 0.03 to 0.38), and problems due to problematic internet use ($\beta = 0.15; t = 5.259, p < 0.001$; 95% CI = 0.28 to 0.61).

We replicated the regression analysis by differentiating participants with a mental health diagnosis ($n = 252$) from those without one ($n = 980$). The variables affecting emotional symptoms and distress in the last six months were consistent across the entire group and these subgroups. The results of the regression are shown in the following table.

Table S2

Results of the multiple regression predicting emotional symptoms and distress over the last six months (n=1232)

Prediction of emotional well-being in the last six months.

A hierarchical regression was performed to investigate whether well-being in different settings and risk and protective factors (intermediate factors in the questionnaire) predicted emotional well-being in the last six months. Gender, age, and factors representing these components were included in the analysis.

The model evaluated was significant ($R^2 = 0.12$; $\Delta R^2 = 0.12$). The variables that contributed to the variance explained were as follows: well-being at home ($\beta = 0.10$; $t = 3.291$, $p < 0.001$; 95% CI = 0.04, 0.16) and school well-being ($\beta = 0.06$; $t = 2.247$, $p < 0.05$; 95% CI = 0.009, 0.13), where higher well-being in the school environment predicted better general well-being; social well-being, culture and leisure ($\beta = -.06$; $t = -1.992$, $p < 0.05$; 95% CI = -0.05, 0.000), where lower well-being in these areas negatively influenced general well-being; also contributing to the variance explained were the expectation of social support ($\beta = 0.06$; $t = 1.930$, $p < 0.05$; 95% CI = 0.000, 0.05); psychosocial life skills ($\beta = 0.21$; $t = 6.987$, $p < 0.001$; 95% CI = 0.07 to 0.13), which emerged as the most significant positive predictor of well-being; and problems due to problematic internet use ($\beta = 0.08$; $t = 2.744$, $p < 0.05$; 95% CI = 0.03 to 0.20).

We replicated the regression analysis by differentiating participants with a mental health diagnosis ($n = 252$) from those without one ($n = 980$). The variables affecting emotional well-being in the last six months were consistent across the entire group and these subgroups. The variables that showed the greatest effect on well-being were well-being at home and psychosocial life skills. The results of the regression are shown in the following table.

Table S3

Results of the multiple regression predicting well-being last six months (n=1232)

Variables	B	95% CI para B	SE B	t	β	R ²	ΔR^2

Analysis Summary

Date and Time

Date: sábado, 22 de junio de 2024

Time: 6:36:42 a. m.

Title

factores de proteccion: sábado, 22 de junio de 2024 6:36 a. m.

Groups

Group number 1 (Group number 1)

Notes for Group (Group number 1)

The model is recursive.

Sample size = 1232

Variable Summary (Group number 1)

Your model contains the following variables (Group number 1)

Observed, endogenous variables

AMIGOS
COMFAM
GRUPOS
RECREA
CULTUR
DEPORT
DORMIR
COMER
APOYPAR
APOYFAM
APOYAMIG
APOYCOMP
APOTTRAB
APOYDOC
APOYBIE
APOYCOM
FORTALZ
EMPATI
EXPRSN
INTERACT
DECISNS
AFRONT
INNOVA
CUESTIN
EXPRESEMOC
INDENTIF

Variable counts (Group number 1)

Number of variables in your model: 55
Number of observed variables: 26
Number of unobserved variables: 29
Number of exogenous variables: 29
Number of endogenous variables: 26

Parameter Summary (Group number 1)

	Weights	Covariances	Variances	Means	Intercepts	Total
Fixed	29	0	0	29	0	58
Labeled	0	0	0	0	0	0
Unlabeled	23	9	29	0	26	87
Total	52	9	29	29	26	145

Models

Default model (Default model)

Notes for Model (Default model)

Computation of degrees of freedom (Default model)

Number of distinct sample moments: 377
 Number of distinct parameters to be estimated: 87
 Degrees of freedom (377 - 87): 290

Result (Default model)

Minimum was achieved

Chi-square = 1173,185

Degrees of freedom = 290

Probability level = ,000

Models

Default model (Default model)

Notes for Model (Default model)

Computation of degrees of freedom (Default model)

Number of distinct sample moments: 496
 Number of distinct parameters to be estimated: 81
 Degrees of freedom (496 - 81): 415

Result (Default model)

Minimum was achieved

Chi-square = 1721. 005

Degrees of freedom = 0 415

Probability level = 0.000

Analysis Summary

Date and Time

Date: sábado, 22 de junio de 2024
 Time: 11:18:07 a. m.

Title

Resultados 1: sábado, 22 de junio de 2024 11:18 a. m.

Groups

Group number 1 (Group number 1)

Notes for Group (Group number 1)

The model is recursive.

Sample size = 1232

Variable Summary (Group number 1)

Your model contains the following variables (Group number 1)

Observed, endogenous variables

NERVS
PRCUPC
ZOZ
TENSINE
TRIT
IRRIT
NODISFR
PERDDNT
TRAQUIL
ALGR
VITALI
OPTIM
PROBS
DOLRMU
DOLCA
COMRM
PROBLDI

Unobserved, exogenous variables

SINT
e1
e2
e3
e4
e5
e6
e7
e8
BIEN
e9
e10
e11
e12
FIS
e13
e14
e15
e16
e17

Variable counts (Group number 1)

Number of variables in your model: 37
Number of observed variables: 17
Number of unobserved variables: 20
Number of exogenous variables: 20
Number of endogenous variables: 17

Parameter Summary (Group number 1)

	Weights	Covariances	Variances	Means	Intercepts	Total
Fixed	20	0	0	0	0	20
Labeled	0	0	0	0	0	0
Unlabeled	14	5	20	0	0	39
Total	34	5	20	0	0	59

Models

Default model (Default model)

Notes for Model (Default model)

Computation of degrees of freedom (Default model)

Number of distinct sample moments: 153
 Number of distinct parameters to be estimated: 39
 Degrees of freedom (153 - 39): 114

Result (Default model)

Minimum was achieved

Chi-square = 867,788

Degrees of freedom = 114

Probability level = ,000

Group number 1 (Group number 1 - Default model)

Estimates (Group number 1 - Default model)

Scalar Estimates (Group number 1 - Default model)

Maximum Likelihood Estimates

Regression Weights: (Group number 1 — Default model)

Resutados 6 meses: sábado, 22 de junio de 2024 1:05 p. m.

Groups

Group number 1 (Group number 1)

Notes for Group (Group number 1)

The model is recursive.

Sample size = 1232

Variable Summary (Group number 1)

Your model contains the following variables (Group number 1)

Observed. endogenous variables

MESNR
MESP
MESZZ
MESTN
MESTRI
MESIR
MESDI
PERIN
MPROS
MDOLMU
MCABE
MCOME
MDIGE
MESTR
MALEG
MILUSI
MEVIT

Unobserved. exogenous variables

MALEST

e2
e3
e4
e5
e6
e7
e8
FISC
e9
e10
e11
e12
e13
BIENS
e14
e15
e17
e18

Variable counts (Group number 1)

Number of variables in your model: 37
Number of observed variables: 17
Number of unobserved variables: 20
Number of exogenous variables: 20
Number of endogenous variables: 17

Parameter Summary (Group number 1)

	Weights	Covariances	Variances	Means	Intercepts	Total
Fixed	20	0	0	0	0	20
Labeled	0	0	0	0	0	0
Unlabeled	14	5	20	0	0	39
Total	34	5	20	0	0	59

Models

Default model (Default model)

Notes for Model (Default model)

Computation of degrees of freedom (Default model)

Number of distinct sample moments: 153

Number of distinct parameters to be estimated: 39
 Degrees of freedom (153 - 39): 114

Result (Default model)

Minimum was achieved

Chi-square = 997.891

Degrees of freedom = 114

Probability level = 0.000

Analysis Summary

Date and Time

Date: martes, 17 de diciembre de 2024
Time: 4:11:47 a. m.

Title

Afctotal: martes, 17 de diciembre de 2024 4:11 a. m.

Groups

Group number 1 (Group number 1)

Notes for Group (Group number 1)

The model is recursive.

Sample size = 576

Variable Summary (1 Females)

Your model contains the following variables (1 Females)

Variable counts (1 Females)

Number of variables in your model: 251
Number of observed variables: 115
Number of unobserved variables: 136
Number of exogenous variables: 136
Number of endogenous variables: 115

Parameter Summary (1 Females)

	Weights	Covariances	Variances	Means	Intercepts	Total
Fixed	136	0	0	136	0	272
Labeled	94	229	136	0	115	574
Unlabeled	0	0	0	0	0	0
Total	230	229	136	136	115	846

Variable counts (2 Males)

Number of variables in your model: 251

Number of observed variables: 115
 Number of unobserved variables: 136
 Number of exogenous variables: 136
 Number of endogenous variables: 115

Parameter Summary (2 Males)

	Weights	Covariances	Variances	Means	Intercepts	Total
Fixed	136	0	0	136	0	272
Labeled	94	229	136	0	115	574
Unlabeled	0	0	0	0	0	0
Total	230	229	136	136	115	846

Result (Unconstrained)

Minimum was achieved
 Chi-square = 27071.444
 Degrees of freedom = 12422
 Probability level = 0.000

Independence model	.000	.000	.000	.000	.000

Parsimony—Adjusted Measures

Model	PRATIO	PNFI	PCFI
Unconstrained	.948	.672	.774
Measurement weights	.955	.676	.780
Measurement intercepts	.963	.681	.787
Structural covariances	.981	.690	.800
Measurement residuals	.991	.694	.806
Saturated model	.000	.000	.000
Independence model	1.000	.000	.000

NCP

Model	NCP	LO 90	HI 90
Unconstrained	14649.444	14177.971	15128.235
Measurement weights	14669.077	14196.847	15148.628
Measurement intercepts	14700.152	14226.918	15180.711
Structural covariances	14790.760	14315.191	15273.661
Measurement residuals	14943.726	14465.685	15429.099
Saturated model	.000	.000	.000
Independence model	80154.302	79188.900	81126.298

FMIN

Model	FMIN	F0	LO 90	HI 90
Unconstrained	22.009	11.910	11.527	12.299
Measurement weights	22.102	11.926	11.542	12.316
Measurement intercepts	22.220	11.951	11.567	12.342
Structural covariances	22.483	12.025	11.638	12.418
Measurement residuals	22.715	12.149	11.761	12.544
Saturated model	.000	.000	.000	.000
Independence model	75.825	65.166	64.381	65.956

RMSEA

Model	RMSEA	LO 90	HI 90	PCLOSE
Unconstrained	.031	.030	.031	1.000
Measurement weights	.031	.030	.031	1.000
Measurement intercepts	.031	.030	.031	1.000
Structural covariances	.031	.030	.031	1.000
Measurement residuals	.031	.030	.031	1.000
Independence model	.071	.070	.071	.000

AIC

Model	AIC	BCC	BIC	CAIC
Unconstrained	29367.444	29904.660	30082.090	30535.090
Measurement weights	29293.077	29786.304	42924.803	43377.803
Measurement intercepts	29209.152	29648.564	43185.878	43638.878
Structural covariances	29067.760	29398.606	43740.486	44193.486
Measurement residuals	29087.726	29356.334	44159.452	44612.452
Saturated model	27140.000	33490.186	3223.726	3676.726
Independence model	94184.302	94399.562	109598.028	110051.028

ECVI

Model	ECVI	LO 90	HI 90	MECVI
Unconstrained	23.876	23.493	24.265	24.313

Model	ECVI	LO 90	HI 90	MECVI
Measurement weights	23.816	23.432	24.205	24.217
Measurement intercepts	23.747	23.363	24.138	24.105
Structural covariances	23.632	23.246	24.025	23.901
Measurement residuals	23.649	23.260	24.043	23.867
Saturated model	22.065	22.065	22.065	27.228
Independence model	76.573	75.788	77.363	76.748

HOELTER

Model	HOELTER	HOELTER
	.05	.01
Unconstrained	578	583
Measurement weights	580	585
Measurement intercepts	582	587
Structural covariances	585	590
Measurement residuals	585	590
Independence model	178	179

Nested Model Comparisons

Assuming model Unconstrained to be correct:

Model	df	CMIN	p	NFI	IFI	RFI	TLI
				Delta-1	Delta-2	rho-1	rho2
Measurement weights	94	113.633	.082	.001	.001	-.001	-.001
Measurement intercepts	209	259.708	.010	.003	.003	-.002	-.003
Structural covariances	441	582.316	.000	.006	.007	-.004	-.005
Measurement residuals	574	868.282	.000	.009	.011	-.004	-.005

Assuming model Measurement weights to be correct:

Model	df	CMIN	p	NFI	IFI	RFI	TLI
				Delta-1	Delta-2	rho-1	rho2
Measurement intercepts	115	146.075	.027	.002	.002	-.001	-.001
Structural covariances	347	468.683	.000	.005	.006	-.003	-.004
Measurement residuals	480	754.649	.000	.008	.009	-.003	-.004

Assuming model Measurement intercepts to be correct:

Model	df	CMIN	p	NFI	IFI	RFI	TLI
				Delta-1	Delta-2	rho-1	rho2
Structural covariances	232	322.608	.000	.003	.004	-.002	-.002
Measurement residuals	365	608.574	.000	.007	.008	-.002	-.002

Assuming model Structural covariances to be correct:

Model	df	CMIN	p	NFI	IFI	RFI	TLI
				Delta-1	Delta-2	rho-1	rho2
Measurement residuals	133	285.966	.000	.003	.004	.000	.000
