

Supplementary Material

Supplementary Table S1. Sources of materials tested.

Supplementary Table S2. Relative retention time of common peaks in replicate experiments.

Supplementary Table S3. Relative peak area of common peaks in replicate experiments.

Supplementary Table S4. Precision experiment common peak relative retention time.

Supplementary Table S5. Precision experiment common peak relative peak area.

Supplementary Table S6. Relative retention time of common peaks in stability experiments.

Supplementary Table S7. Stability experiment common peak relative peak area.

Supplementary Figure S1. The base peak chromatograms (BPCs) in negative mode CI (A) and CG (B).

Supplementary Figure S2. Scavenging abilities (%) of CG and CI at different concentrations, determined by DPPH assay. L(+)-ascorbic acid (Vc).

Supplementary Figure S3. Scavenging abilities (%) of CG and CI at different concentrations, determined by DPPH assay. L(+)-ascorbic acid (Vc).

Supplementary Figure S4. Inhibitory effects of CG and CI on α -glucosidase activities.

Supplementary Figure S5. Purity determination of the components obtained from preparative HPLC. (A) CGA peak with >95% purity (UV 258 nm) ; (B) HPLC analysis of CG after removal of CGA; (C) HPLC analysis of CG; (D) CIA peak with >80% purity (UV 258 nm) ; (E) HPLC analysis of CI after removal of CIA; F: HPLC analysis of CI.

Supplementary Table S1. Sources of materials tested.

| NO. | Name | Collection | Soure |
|------|--|------------|-------------------|
| CG1 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2015.07 | Jimisar County |
| CG2 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2015.07 | Jimisar County |
| CG3 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.07 | Jimisar County |
| CG4 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.06 | Jimisar County |
| CG5 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.06 | Jimisar County |
| CG6 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.06 | Jimisar County |
| CG7 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.07 | Manasi County |
| CG8 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.06 | Jimisar County |
| CG9 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.08 | Urumqi city |
| CG10 | <i>Cichorium glandulosum</i> Boiss. et Huet | 2017.09 | Purchased in CFDR |
| CI1 | <i>Cichorium intybus</i> L. | 2020.06 | Urumqi city |
| CI2 | <i>Cichorium intybus</i> L. | 2020.06 | Urumqi city |
| CI3 | <i>Cichorium intybus</i> L. | 2020.06 | Urumqi city |
| CI4 | <i>Cichorium intybus</i> L. | 2020.06 | Urumqi city |

Supplementary Figure S1. The base peak chromatograms (BPCs) in negative mode CI (A) and CG (B).

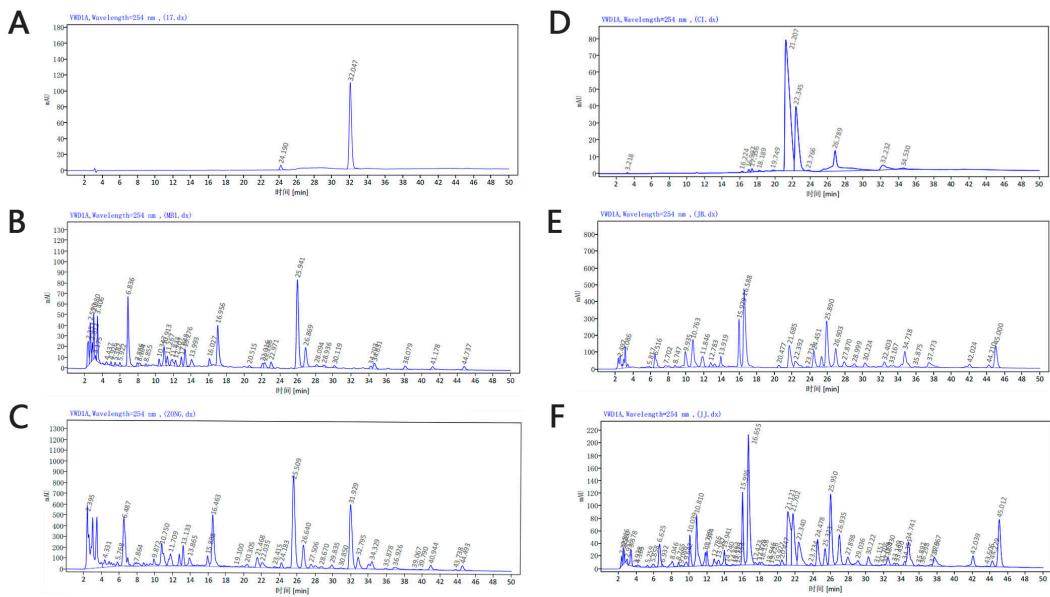

Supplementary Figure S2. Scavenging abilities (%) of CG and CI at different concentrations, determined by DPPH assay. L(+)-ascorbic acid (Vc).

Supplementary Figure S3. Scavenging abilities (%) of CG and CI at different concentrations, determined by ABTS assay. L(+)-ascorbic acid (Vc).

Supplementary Figure S4. Inhibitory effects of CG and CI on α -glucosidase activities.

Supplementary Figure S5. Purity determination of the components obtained from preparative HPLC. (A) CGA peak with >95% purity (UV 258 nm) ; (B) HPLC analysis of CG after removal of CGA; (C) HPLC analysis of CG; (D) CIA peak with >80% purity (UV 258 nm) ; (E) HPLC analysis of CI after removal of CIA; F: HPLC analysis of CI.
