

Table S9 Result Of Evidence Quality （GRADE）									
Outcome	Review	Certainty assessment							Certainty
		Relative effect (95%CI)	Studies (sample size)	Risk of bias	Inconsistency	Indirectness	Imprecision	Other considerations	
Renal outcome composite	Zannad et al,2020 ^[45]	HR 0.62 (0.43,0.90)	2 (118)	not serious	serious(e)	not serious	serious(h)	not serious	low
Renal outcome composite	Butler et al,2020 ^[52]	HR 0.60 (0.48,0.75)	4	not serious	not serious	not serious	not serious	not serious	High

e: poor overlap of confidence interval; h: sample size is too small; HR: hazard rate
