

Supplementary Data

Table S3. The parameters for *de novo* genome assembly and annotation of PB4

Features	<i>S. sclerotiorum</i> PB4
Total contig number	27
Total length (bp)	39,218,820
Total ungapped length (bp)	39,218,820
Coverage	148×
Contig N50 length (bp)	2,127,701
G+C content (%)	41.52%
Repeat (%)	11.47%
Number of gene	11,248
Number of CDS	32,363
Number of exon	32,358
