

Below are the charts containing the information on microbial relative abundance discussed in section 3.5 of the manuscript.

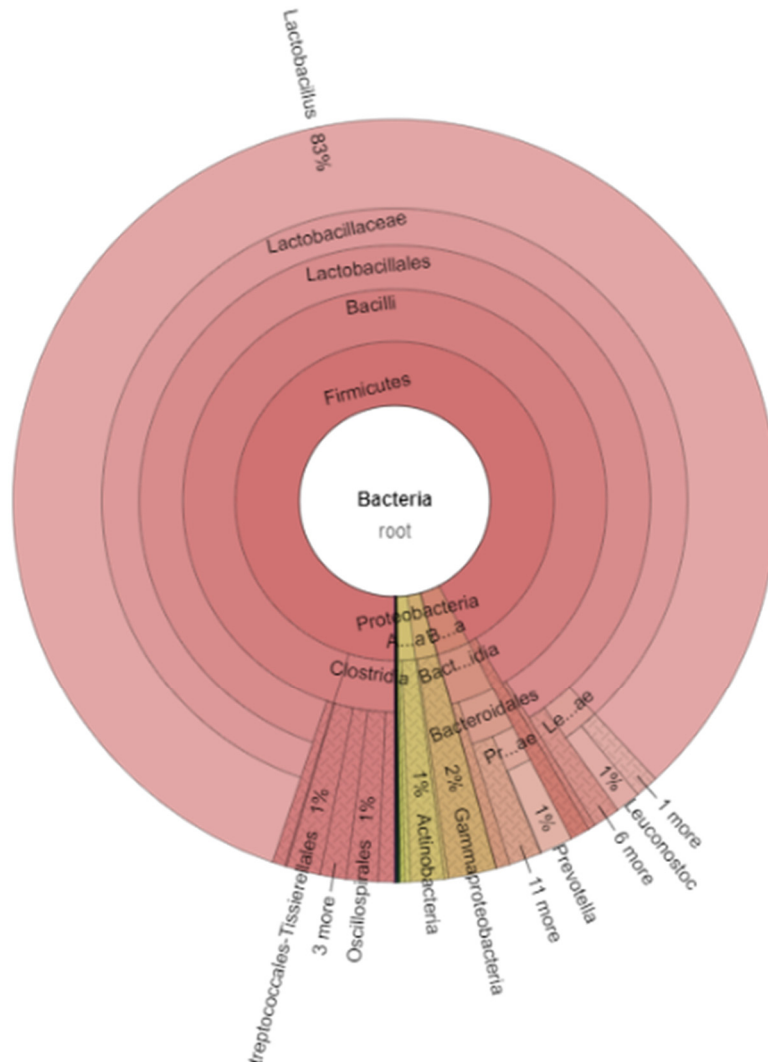

Figure S1. Microbial relative abundance for urea addition experiment part III, Control-Replicate 1

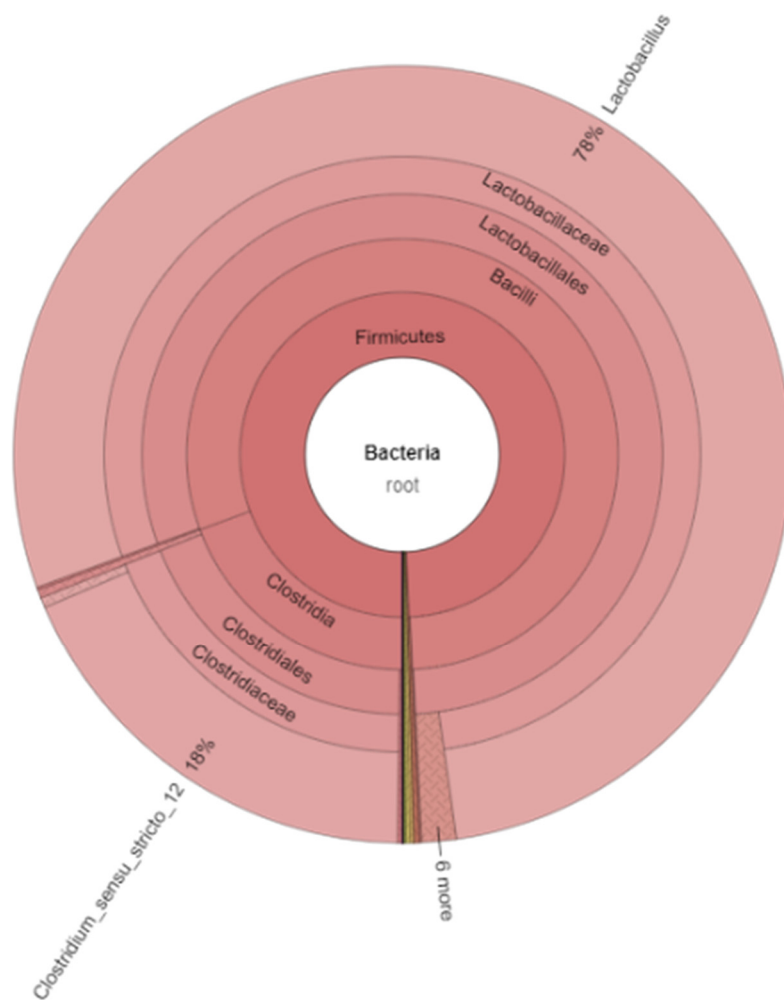

Figure S2. Microbial relative abundance for urea addition experiment part III, Control-Replicate 2

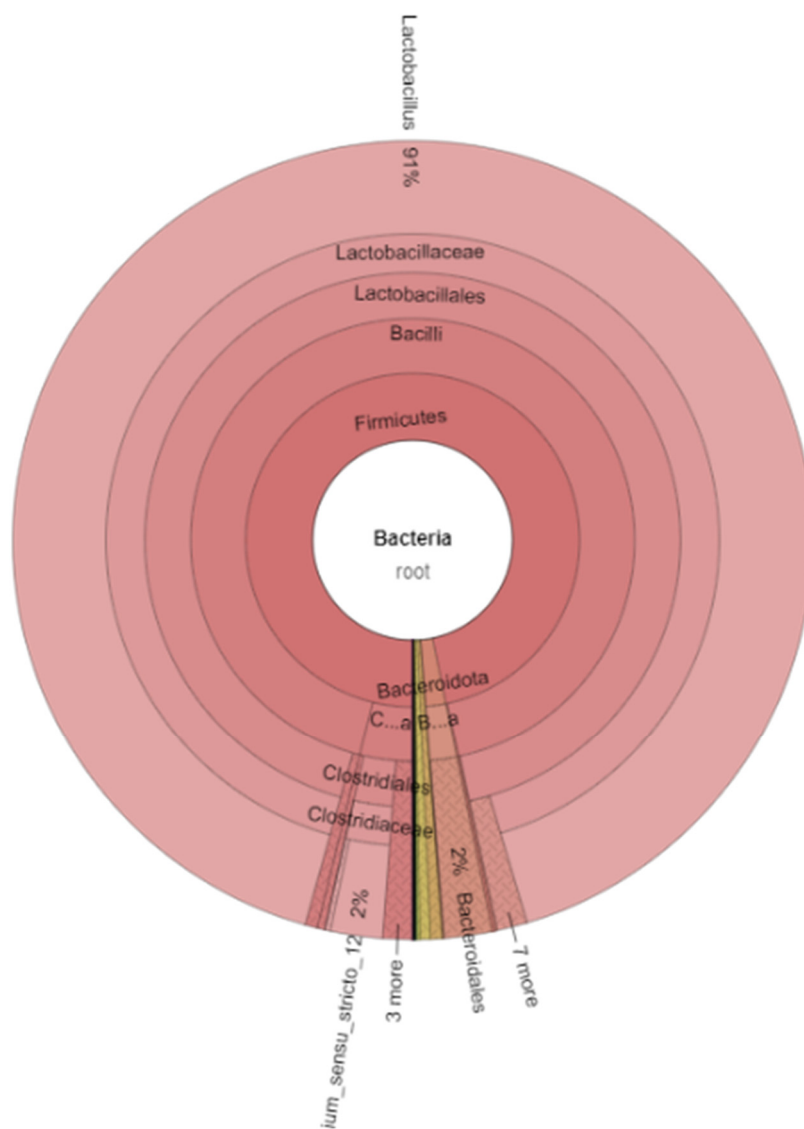

Figure S3. Microbial relative abundance for urea addition experiment part III, A-pH equivalent-Replicate 1

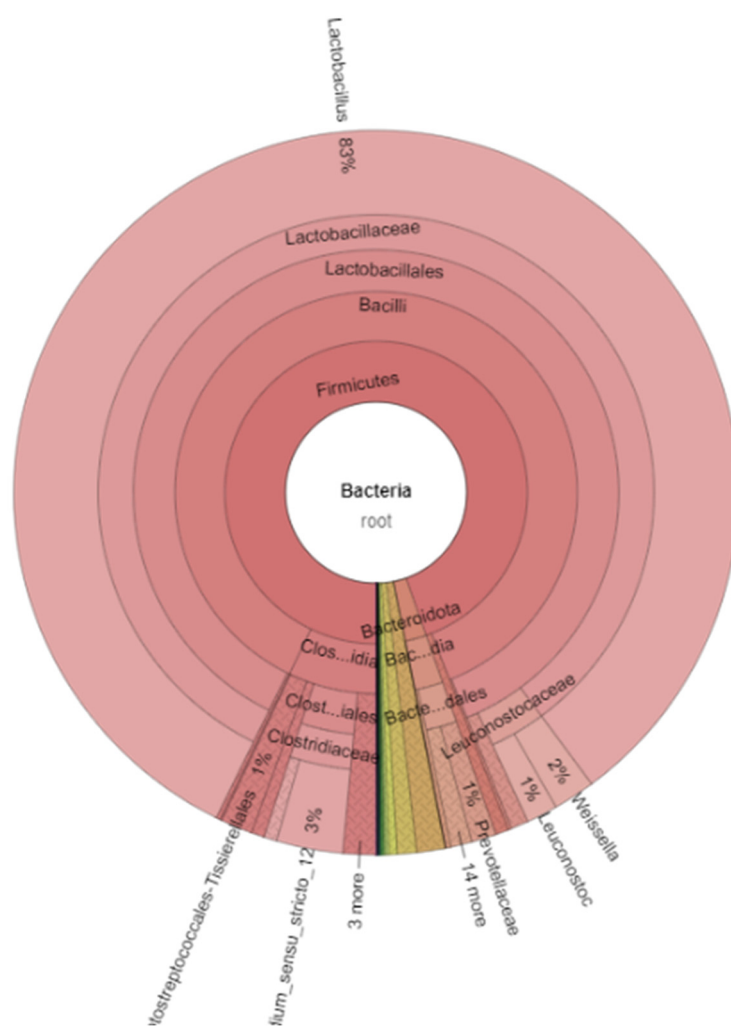

Figure S4. Microbial relative abundance for urea addition experiment part III, A-pH equivalent-Replicate 2

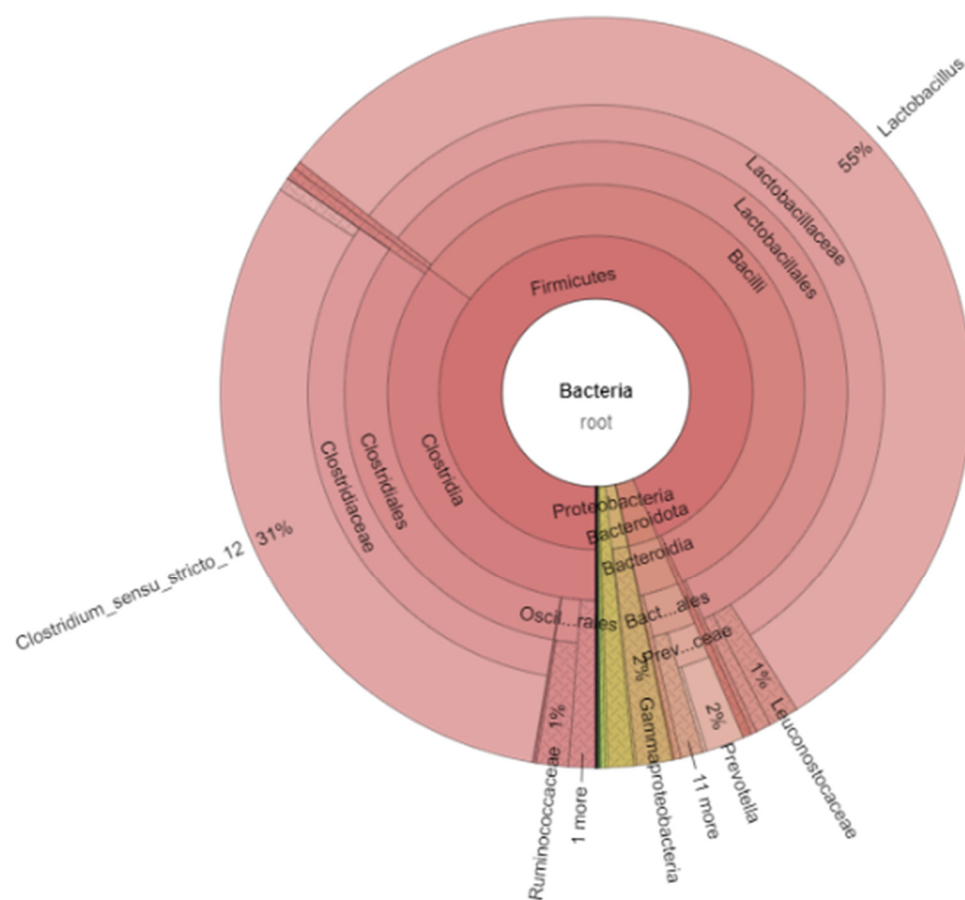

Figure S5. Microbial relative abundance for urea addition experiment part III, A-Replicate 1

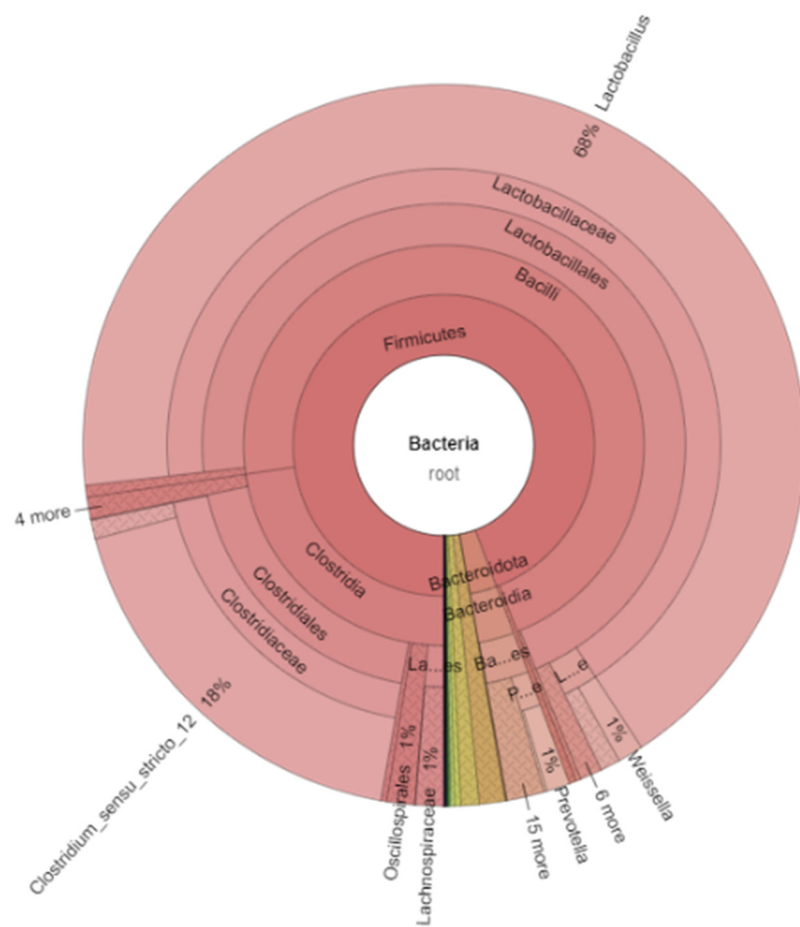

Figure S6. Microbial relative abundance for urea addition experiment part III, A-Replicate 2

Figure S7. Microbial relative abundance for urea addition experiment part III, B-pH equivalent-Replicate 1

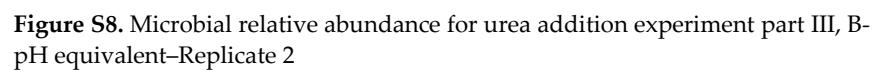

Figure S8. Microbial relative abundance for urea addition experiment part III, B-pH equivalent-Replicate 2

Figure S9. Microbial relative abundance for urea addition experiment part III, B-Replicate 1

Figure S10. Microbial relative abundance for urea addition experiment part III, B-Replicate 2

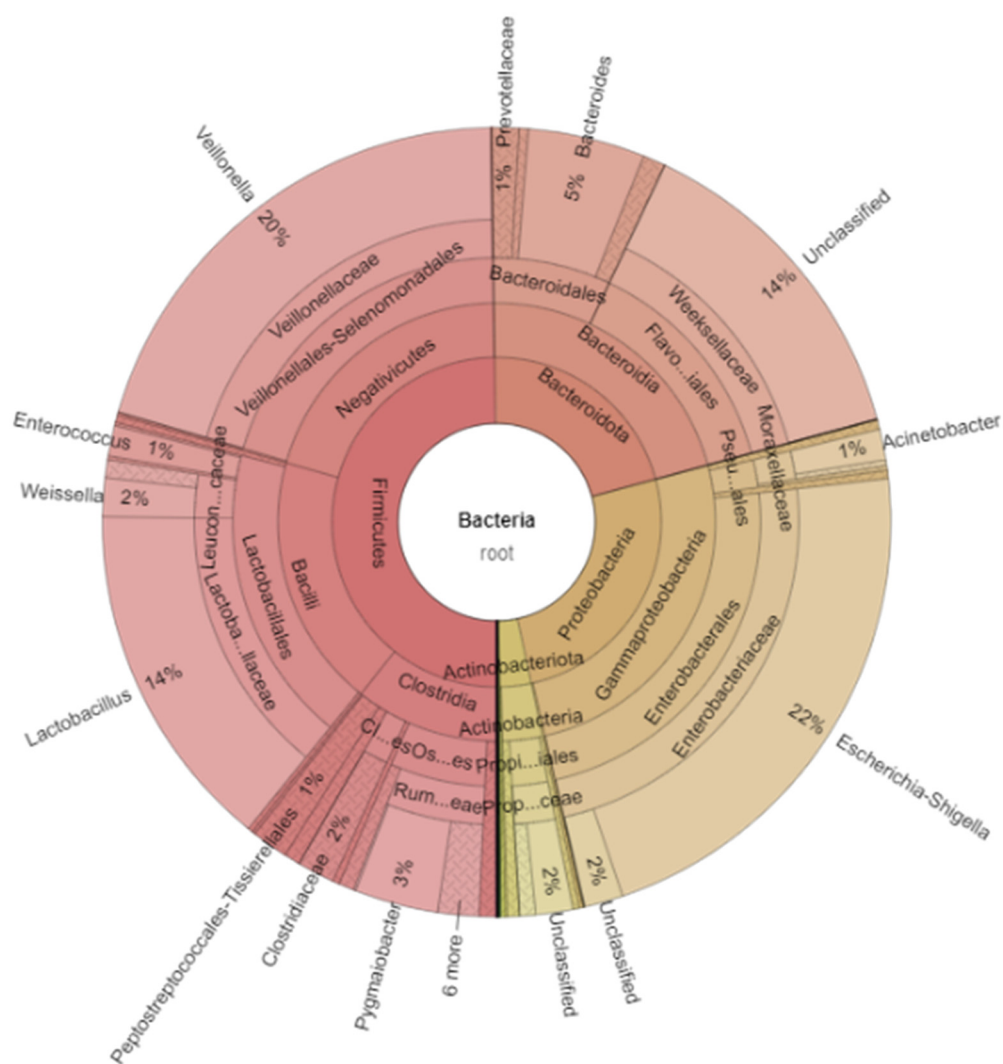

Figure S11. Microbial relative abundance for urea addition experiment part III, C-pH equivalent-Replicate 1

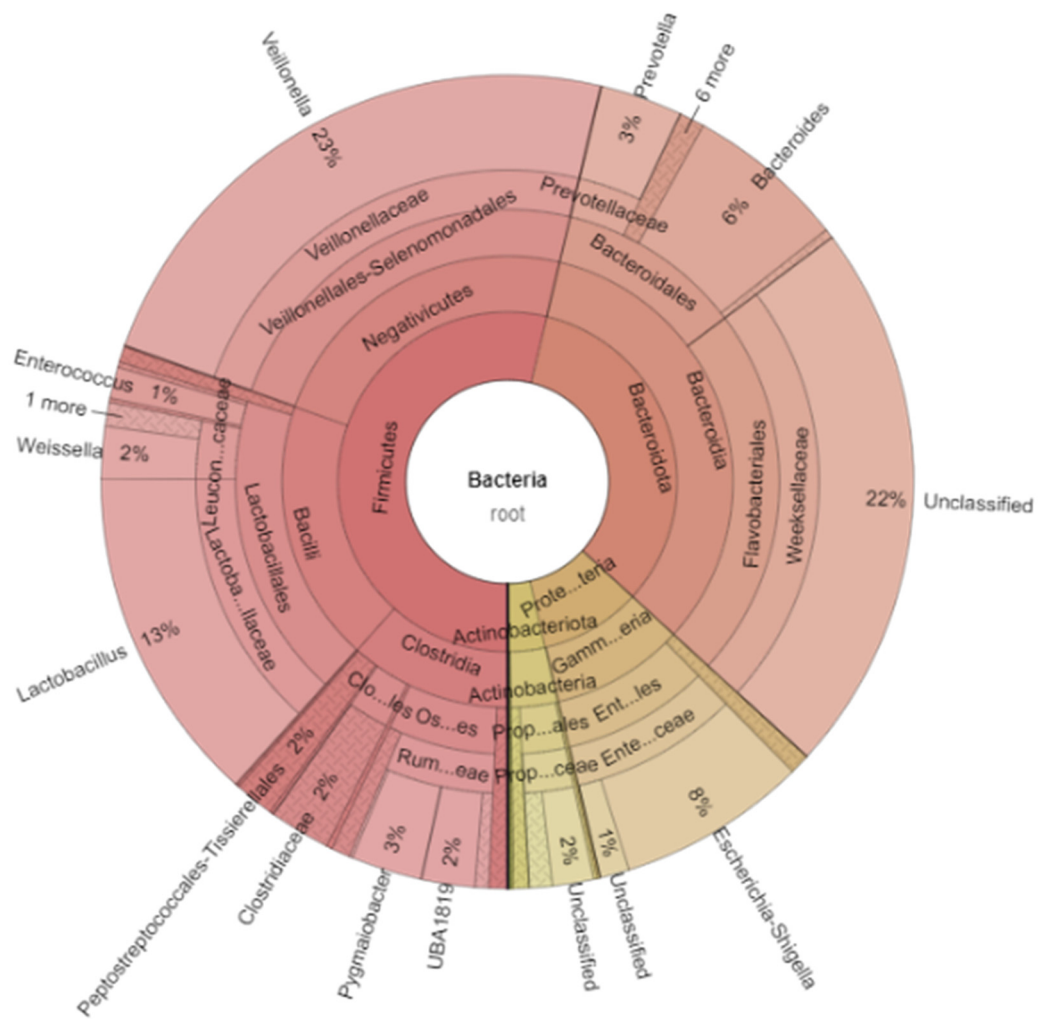

Figure S12. Microbial relative abundance for urea addition experiment part III, C-pH equivalent-Replicate 2

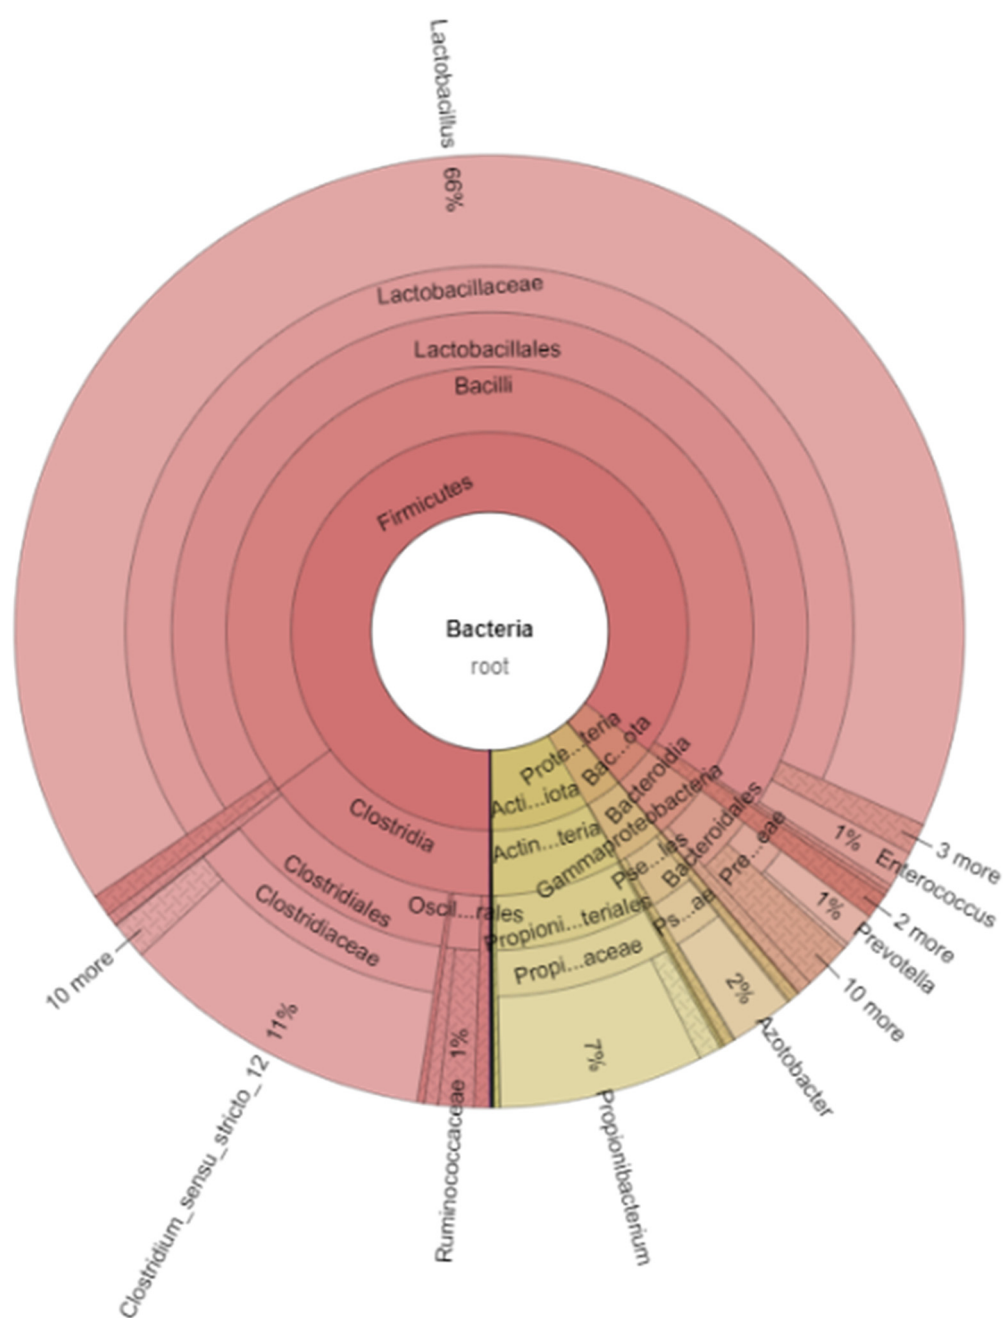

Figure S14. Microbial relative abundance for urea addition experiment part III, C-replicate 2
