Overview comments	This manuscript was edited for grammar and clarity and was improved. It reads well and the logic of the experimental set-up and the explanations of the results are clearly presented. Please check all edits carefully to be sure your meaning remains intact. There are also some comments in the margins with suggestions for potential modifications. Please be sure that the methods section is sufficiently detailed for your target journal (add details of how many samples processing, sequencing depth, etc.). Be sure the figures, tables, legends, and other material not included here are presented clearly. After addressing the comments and incorporation of the suggested edits, the revised manuscript should be ready to be submitted for publication consideration.
