## Supplementary material

**Figure S1.** Oscillation of the monthly commercial ‘Srdelara’ purse seine landings in fishing subzone G2 (black area) and the entire Croatian fishing grounds (grey area), November 2020 to March 2022.

**Figure S2.** Quantitative-qualitative composition of the commercial 'Srdelara' purse seine landings in the Middle Eastern Adriatic, November 2020 to March 2022: (A) the contribution of the main small pelagic fish species to the landings and (B) the contribution of by-catch species within the 'Other' category.
