

Online Appendix for Earl et al., Effects of soil, light, and temperature on freshwater tannin concentrations.

Table S1. Characteristics of grassland and forest wetland ponds where soil was collected.

Soil Variable	Grassland	Forest
Pond Size	8.40 m ²	54.43 m ²
Canopy Cover	29%	100%
Conductivity	22	39
pH	5.71	5.87
DO	12.30	3.22
Temp.	16.5°C	11.7°C

Figure S1. Temperature during the temperature experiment examining effects on tannin water concentrations. Error bars are standard error.
