The journal retracts the proceedings paper, titled “Biodiversity Loss with Habitat and Risk of New Diseases” [1], cited above.

Following publication, concerns were brought to the attention of the Editorial Office regarding an overlap between this publication [1] and a previously published article [2] produced by a different authorship group.

Adhering to our complaints procedure, the Editorial Office and the Advisory Board conducted an investigation that confirmed a significant overlap between the two articles [1,2], without appropriate acknowledgment or citation. As a result, the Conference Chair and Advisory Board have decided to retract this paper as per MDPI’s retraction policy (https://www.mdpi.com/ethics#_bookmark30).

This retraction was approved by the Advisory Board of the *Biology and Life Sciences Forum* journal.

The authors did not provide a comment on this decision.
