

## Special Issue

# Health Assessment in the Big Data Era

### Message from the Guest Editors

Healthcare represents an important data source for different purposes, such as supporting diagnostic processes, predicting epidemics, improving quality of life, and avoiding preventable casualties. The main objective of this Special Issue is to collect papers with different views and approaches to this domain; methods motivated by the need to improve Healthcare, reduce costs, and achieve more effective diagnostics. In the Big Data Era, the volume of digital information continuously increases, and requires our attention not only from the technological point of view, but from the perspective of trust and ethics as well. The large volumes of data available in this field provide new opportunities to develop various technological solutions, all the while having the patients' interest as a priority. Automated decision-making in Healthcare must respect existing differences and specific conditions in order to operate properly and correctly. It requires considering a veracity of available data with the strong influence on the reliability of developed methods and tools.

## About the Journal

### Message from the Editor-in-Chief

*Big Data and Cognitive Computing (BDCC)* is a scholarly online journal which provides a platform for big data theories with emerging technologies on smart clouds and exploring supercomputers with new cognitive applications. It is a peer-reviewed, open access journal that publishes high quality original articles, reviews and short communications. The primary aims of this journal are to encourage contributions of high quality scientific papers relating to data management and analytics in industry, such as manufacturing, healthcare, education, media and business, data mining, and cognitive science. There is no restriction on the maximum length of the papers.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility

: indexed within Scopus, ESCI (Web of Science), dblp, Inspec, Ei Compendex, and other databases.

#### Journal Rank:

JCR - Q1 (Computer Science, Theory and Methods) /  
CiteScore - Q1 (Management Information Systems)
