

## Special Issue

# Aqueous Rechargeable Batteries

### Message from the Guest Editor

The Special Issue is open to research on the development of aqueous batteries. This includes investigations into novel aqueous battery system design, electrolyte innovations, and electrode materials development aimed at overcoming key challenges such as narrow electrochemical stability window, limited operational temperature ranges, low energy density and short cycle life. By improving these aspects, the goal is to enhance the specific capacity, energy density and long-term cycle life of aqueous batteries for more effective utilization.

# About the Journal

## Message from the Editor-in-Chief

---

### Editor-in-Chief

Prof. Dr. Alírio E. Rodrigues

Laboratory of Separation and Reaction Engineering - Laboratory of Catalysis and Materials (LSRE-LCM), Department of Chemical Engineering, Faculty of Engineering, University of Porto, 4200-465 Porto, Portugal

---

### Author Benefits

#### High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (General Engineering )

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 32.8 days after submission; acceptance to publication is undertaken in 6.1 days (median values for papers published in this journal in the second half of 2024).
