# Message from the Editor-in-Chief

We are just entering the Next Wave of Technology (NWT) where actuators will play the same role as the computer chip did for computers/social media approximately four decades ago. Just in the U.S., production of \$1 trillion year of electromechanical systems (vehicles, orthotics, manufacturing cells, freight trains, aircraft, etc.) will be impacted by the NWT, all driven by actuators. Five key trends can be found for the future perspectives: “Performance to Reliability”, “Hard to Soft”, “Macro to Nano”, “Homo to Hetero” and “Single to Multi functional”. We invite papers that primarily impact these economic sectors; those illustrating basic scientific principles are also welcome.

---

## **Editor-in-Chief**

Prof. Dr. Kenji Uchino

---

## **Aims**

*Actuators* (ISSN 2076-0825) provides an advanced forum for the science and technology of actuator materials, device design and control systems. It publishes reviews (including comprehensive assessments on complete actuator products), regular research papers and short notes. Our aim is to encourage scientists to publish their experimental and theoretical results as concisely as possible.

---

## Scope

- Control systems, integration of actuators into control systems
- Electromechanical actuators
- Electromagnetic actuators
- Piezoelectric and electrostrictive actuators
- Electrodynamic actuators
- Fluid mechanical actuators
- Pneumatic actuators
- Hydraulic actuators
- Smart actuators
- Magnetostrictive, shape memory and chemical actuators
- Efficiency and operational SFW of actuators

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### 2023 Impact Factor: 3.7

*(Journal Citation Reports - Clarivate, 2024)*

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures, or use of colors

### Journal Rank

JCR - Q2 (*Engineering, Mechanical*) /

CiteScore - Q2 (*Control and Optimization*)

### Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), Inspec, and other databases

### Rapid Publication

A first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2024)
