

Special Issue

Aeroacoustic Analysis

Message from the Guest Editor

This Special Issue of *Aerospace* will present the state of the art of aeroacoustic analysis at a turning point in the discipline. Papers covering the full range of noise prediction, measurement, control, analysis, and reduction are invited. In particular, work which offers the potential for non-incremental improvement in capabilities, necessary for the reduction of noise at source, and for the control of noise in the environment, is welcomed. This could include novel passive and active control concepts, such as metamaterials, advanced prediction methods for source and propagation modelling, and new concepts for aircraft configurations and operation.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
