

Topical Collection

Avionic Systems

Message from the Collection Editors

This Special Issue is aimed at the dissemination of research and engineering advances on avionic systems for CNS and GNC, including challenges and opportunities for current and future avionics for aeronautics and astronautics. Topics and areas of the Special Issue include but are not limited to:

- Application of Artificial Intelligence in avionic systems;
- Robotic avionics and autonomous avionics for air/space vehicles;
- Smart CNS avionics for airspace/space integration of unmanned systems;
- Connectivity and cybersecurity certification of avionic systems;
- Human–avionics collaboration for augmented intelligence;
- Distributed integrated modular avionics and future avionics architectures and networks;
- Reconfigurable GNS avionics for next generations of air/space transport;
- Intelligent satellite constellation and radar satellites;
- Avionics power management and distribution;
- Cyber-physical avionics systems.

About the Journal

Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

Aerospace adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Konstantinos Kontis
School of Engineering, University of Glasgow, James Watt Building
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2
(Aerospace Engineering)
