

## Special Issue

# Gas Turbine and the Environment: Towards Net Zero CO<sub>2</sub> Propulsion Systems

### Message from the Guest Editors

In this context, this Special Issue on Gas Turbines and the Environment is focused on concepts and technologies that will lead to a new, carbon free, and low emissions era for aviation and air-transport. Papers concerning the following topics are of particular interest and highly encouraged:

- Fuels and combustion;
- Novel cycles, engine configurations, and propulsion architectures;
- Component technologies;
- Control strategies and sensor technologies;
- Green operations and life cycle aspects;
- Ground infrastructure for hydrogen and electrified applications.

---

### Guest Editors

Prof. Dr. Panagiotis Laskaridis

Prof. Dr. Konstantinos Kyrianiadis

Dr. Hossein Balaghi Enalou

## About the Journal

### Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2  
(Aerospace Engineering)
