

# Special Issue

## Structural Dynamics and Control

### Message from the Guest Editor

The aim of this Special Issue is to serve the scientific community through the dissemination of the latest achievements on analytical, numerical, and experimental investigations pertaining to structural dynamics analysis and control of aerospace bodies. Original, unpublished manuscripts are solicited on all areas of structural dynamics and control, including but not limited to:

- Morphing structures;
- Adaptive structures;
- Smart structures;
- Bistable structures;
- Structural health monitoring;
- Vibration energy harvesting;
- Structural vibration control;
- Nonlinearity detection, identification, and modeling;
- Stability and control investigations related to fluid-structure interaction.

---

### Guest Editor

Prof. Dr. Hekmat Alighanbari

Department of Aerospace Engineering, Ryerson University, Toronto, ON M5B 2K3, Canada

## About the Journal

### Message from the Editor-in-Chief

You are welcome to contribute a research article or a comprehensive review for consideration and publication in *Aerospace* (ISSN 2226-4310), an on-line, open access journal.

*Aerospace* adheres to rigorous peer-review as well as editorial processes and publishes high quality manuscripts that address both the fundamentals and applications of aeronautics and astronautics. Our goal is to enable rapid dissemination of high impact works to the scientific community.

---

### Editor-in-Chief

Prof. Dr. Konstantinos Kontis  
School of Engineering, University of Glasgow, James Watt Building  
South, University Avenue, Glasgow G12 8QQ, Scotland, UK

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Aerospace) / CiteScore - Q2  
(Aerospace Engineering)
