

Special Issue

Animal Nutrition and Productions: Series II

Message from the Guest Editors

Animals' nourishment is one of the most important levers in ensuring the efficiency of animal production, due to both the high share of feed costs in the total cost of products and the influence this has on the growth, reproduction, and health of animals, as well as the quality of products obtained from these. This field is one of the most dynamic in the field of husbandry sciences, due to the takeover and permanent use of numerous results obtained from research on energy metabolism and nutrients, related to the composition of feed and its influence on animal products. This is also due to the great advances in genetics which create new types of animals with an increasing productive potential and different food requirements. This Special Issue is dedicated to interdisciplinary studies on animal nutrition, physiology, chemistry, biochemistry, genetics, reproduction, and breeding technologies. The articles will cover a wide range of topics related to feed quality, the influence of food on production levels, the quality of production, and also on animals' health.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
