

## Special Issue

# Agricultural Crops Subjected to Drought and Salinity Stress

### Message from the Guest Editors

Agriculture is historically vital to the prosperity of civilizations and has withstood the pressure of the environment and population growth due to genetic improvement and plant management. Most agricultural crops are subject to environmental stresses such as drought and salinity. In many cases, these stresses act together, limiting crop productivity. In this view, innovative management strategies can improve the productivity of agricultural crops subjected to unfavorable environmental conditions, such as drought and salinity. This Special Issue focuses on developing and evaluating management strategies for crops subjected to drought and salt stress. For this reason, it welcomes studies of an interdisciplinary nature from research fields related to agriculture, including horticulture, genetics, plant ecophysiology, irrigation, soils, and plant nutrition. Research articles will cover various agricultural crops and solutions for growing them under drought and salt stress conditions. Original research articles and reviews will be accepted.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
