

## Special Issue

# Agrotechnology of Improving Yield and Quality in Field Crops under Climate Change

### Message from the Guest Editors

Global population growth and the increasing demand for food require an improvement in crop yields. However, climate change poses a major challenge to crop production. The negative effects of weather, climate and pedological-topographical factors that cause crop stresses pose a serious threat to plants. Changes in weather conditions require plants to be well-adapted to the climate and to have a defense system in place. Consequently, great emphasis should be placed on understanding the impact of these stress factors and their mechanisms of action. The Special Issue focuses on the assessment of the negative effects of climate change and climate extremes and their mitigation by means of the optimization of the production site conditions, genetic basis, ecophysiological parameters (chlorophyll content, photosynthesis, stomatal conductance, LAI, dry matter formation) and agrotechnical elements, as well as the use of soil-plant sensors. All types of articles on arable crops, e.g., original research and reviews are welcome.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
