

Special Issue

Feature Papers in Agricultural Product Quality and Safety

Message from the Guest Editors

Agriculture is defined as the art and science of growing crops and raising livestock, including the manufacturing of plant and animal products for use by humans. This activity provides not only raw food and ornamental produce, but also a plethora of derived edible products, as well as fabrics and building materials. This Special issue aims to gather high-quality articles that contribute novel insights into all topics related to the composition, quality, safety, and security of agricultural produce and derived products (fresh-cut products, oil, wine, juices, etc.). We welcome submissions that address all aspects of science and technology related to produce quality (chemistry, sensory, pathology, nutritional, health-promoting properties), postharvest handling, processing and manipulation (quality evaluation, preservation, storage, packaging, commercial handling, trade, and distribution). Both original research and review papers are welcome. In order to encourage broader participation and to attract a wider range of high-quality submissions, publication charges for all accepted papers will be waived. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
