Agroecosystem Modeling

Message from the Guest Editors

With recent advancements in the computational ability of different field- and watershed-scale agroecosystem models, proper and adequate evaluation and the uncertainty assessment of such tools under different soil, climatic, and management conditions remain a necessity to validate the model credibility. Further, model evaluation under varying soil and climatic conditions helps to determine the suitability and applicability of such models in assessing the effects of a wide range of management practices and climatic variability on crop production and environment. This Special Issue focuses on the application of agroecosystem models to answer various questions related to current and future agricultural practices to achieve agroecosystem sustainability and food security. For this reason, it welcomes highly interdisciplinary, good-quality studies from disparate research fields including crop modeling, climate–water–food nexus modeling, model–data fusion, and water quality modeling at various scales. Original research articles and reviews are accepted.

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
