

## Special Issue

# Agricultural Citizen Science and Sustainable Regional Development

### Message from the Guest Editors

The concept of citizen science is still less used in the development of sustainable agricultural practices, although its potential is great as a way to motivate rural communities to get involved in projects focused on identifying ways to capitalize on their strengths and meet challenges. This Special Issue aims to offer new perspectives on the importance of the wider use of citizen science in agriculture, with a particular focus on its impact on sustainable regional development. This Special Issue welcomes submissions on the following topics: the role of citizen science in addressing challenges in agriculture and food research; citizen science and the efficient use of resources and enhancing food safety; citizen science and the impacts of climate change on agriculture; and even emerging opportunities in relation to agricultural citizen science (role of technology; involving citizen scientists to support local decision making; involving citizen scientists in linking agriculture with other economic sectors, emergency management and rural extension). Original research articles and reviews are accepted.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.
