

Special Issue

Artificial Intelligence, UAV, and Remote Sensing Applications for Precision Agriculture

Message from the Guest Editors

This Special Issue aims to present recent advances in technologies and algorithms, mainly based on artificial intelligence, to improve the applications of UAVs and remote sensing in precision agriculture. Topics of interest include, but are not limited to, plant disease and pest diagnosis; crop and orchard yield monitoring; advanced fertilization; variable operation prescription technologies; inspection of farms, vineyards or ranch animals; information management and management information systems. In addition, this Special Issue is linked to the XII Iberian Congress of Agroengineering, organized by the University of Seville (Spain) and supported by the Spanish Society of Agroengineering and the Secção Especializada de Engenharia Rural da Sociedade de Ciências Agrárias from Portugal. This congress is a meeting point for researchers and technicians linked to agroengineering in Spain, Portugal, and the entire Ibero-American community. Papers submitted to the Congress on topics of precision agriculture, spatial analysis and data-driven technologies are invited to submit articles to this Special Issue.

Guest Editors

Prof. Dr. Luís Manuel Navas Gracia

Department of Agricultural and Forestry Engineering, University of Valladolid, 34004 Palencia, Spain

Prof. Dr. Manuel Pérez-Ruiz

Department of Aerospace Engineering and Fluid Mechanics, University of Sevilla, Sevilla, Spain

About the Journal

Message from the Editor-in-Chief

Agriculture (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

Editor-in-Chief

Prof. Dr. Les Copeland
Sydney Institute of Agriculture, School of Life and Environmental
Sciences, The University of Sydney, Sydney, NSW 2006, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
