

## Special Issue

# Biological Control of Plant Diseases: Progress and Challenges for the Future

### Message from the Guest Editor

In crop production, various diseases threaten crop production and food supply. To provide safe, high-quality food, it is important to include biological control in plant disease management. Unfortunately, only a limited number of products have been available on the market. The efficacy and spectrum also restrict the application of biocontrol agents in practice. Thus, it is necessary to develop new biocontrol agents with stable efficacy and a new spectrum for controlling various crop diseases. It is also urgent to face and overcome the challenges of plant disease biocontrol in the field by understanding the mode of action of biocontrol agents and using new technology. This Special Issue focuses on biological control of plant diseases, especially progress and challenges for agriculture in the future. To improve the efficacy of plant disease biocontrol, it welcomes highly interdisciplinary quality studies to provide new insights in plant disease biocontrol, including practical application, mode of action, challenges, etc. Original research articles and reviews are welcome and accepted.

## About the Journal

### Message from the Editor-in-Chief

*Agriculture* (ISSN 2077-0472) is an international, crossdisciplinary and scholarly open access journal on the science and technology of crop and animal production, and management of the natural resource base for agricultural production. *Agriculture* is published in an open access format – research articles, reviews and other contents are released on the internet immediately after acceptance. The scientific community and the public have unlimited and free access to the content as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubAg, AGRIS, RePEc, and other databases.

#### Journal Rank:

JCR - Q1 (Agronomy) / CiteScore - Q1 (Plant Science)
